An example of AI Tutor under Knowledge Base Mode

Overview:

This guide will show you how to construct your knowledge base on the XIPU AI platform (https://xipuai.xjtlu.edu.cn/v3/index) and link your knowledge bases to the XIPU AI Block on the Learning Mall Core module pages.

What to know:

A knowledge base for an AI system is a place where users upload files (such as PDFs, Word documents, or spreadsheets) so the AI can access and use them to provide more accurate answers. Instead of relying only on general knowledge, the AI retrieves relevant information from these files when responding to questions. The files are processed and stored in a way that allows the AI to quickly find the right information when needed. To ensure the best results, it's important to organize files clearly, use descriptive filenames, and keep content structured and up to date.

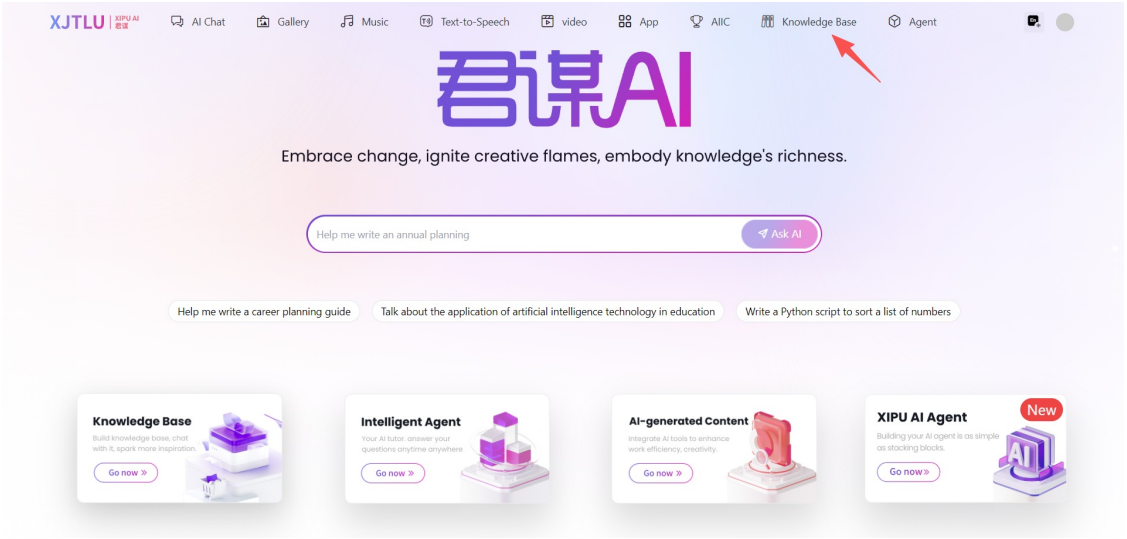
Table of Contents

Step 1: Visit your Knowledge Base area on the XIPU AI Platform
Step 2: Click the "Add knowledge base" button

Step 3: Input the basic information
Step 4: Manage the files in the KB
Step 5: Upload your files
Step 6: Copy the Knowledge Base ID
Step 7: Link the Knowledge Base to the XIPU AI Chat Block

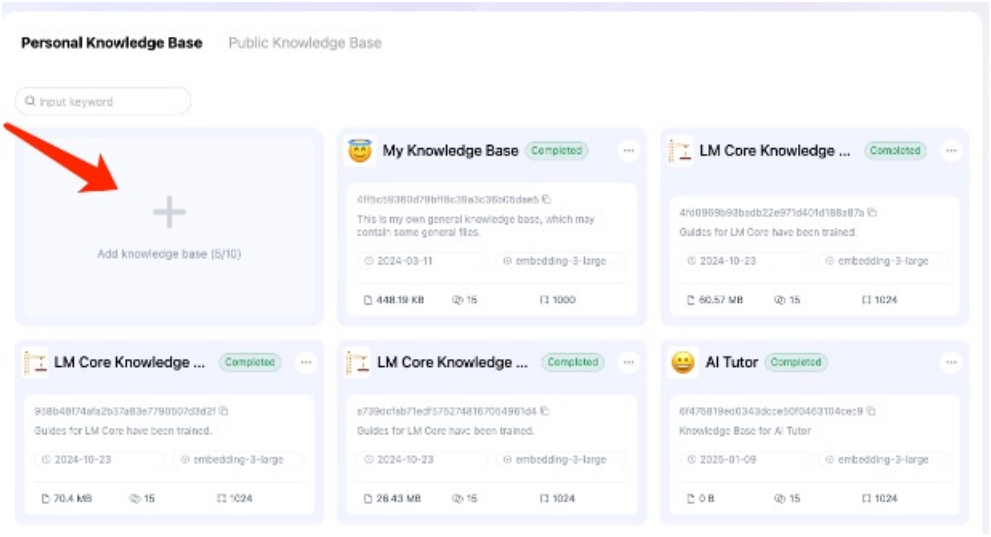
Step 1: Visit your Knowledge Base area on the XIPU AI Platform

Visit https://xipuai.xjtlu.edu.cn/v3/index and then click the "Knowledge Base" button at the top navigation bar; Use your XJTLU account to log in.

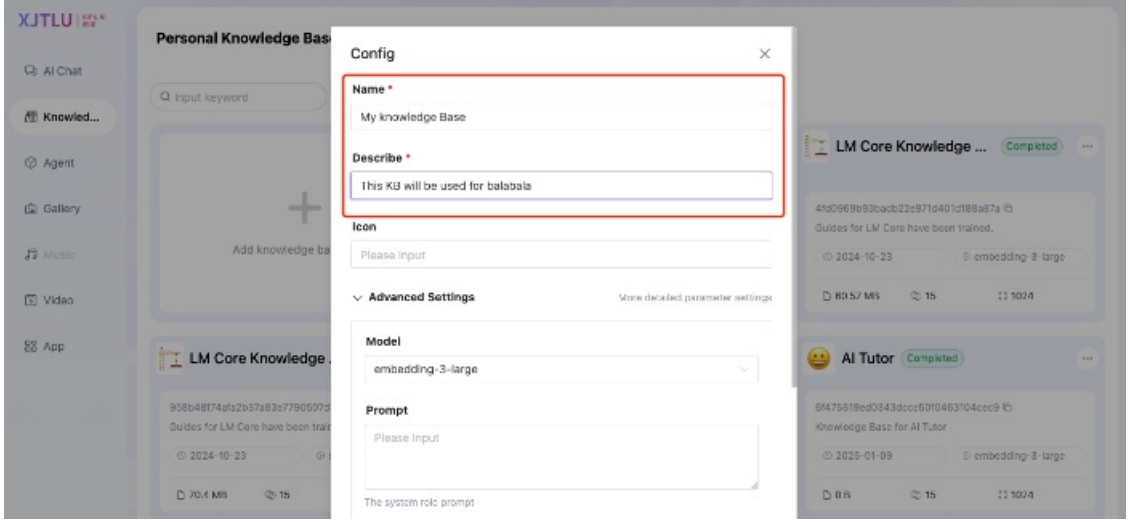


Step 2: Click the "Add knowledge base" button

Each staff can create up to 10 knowledge bases.

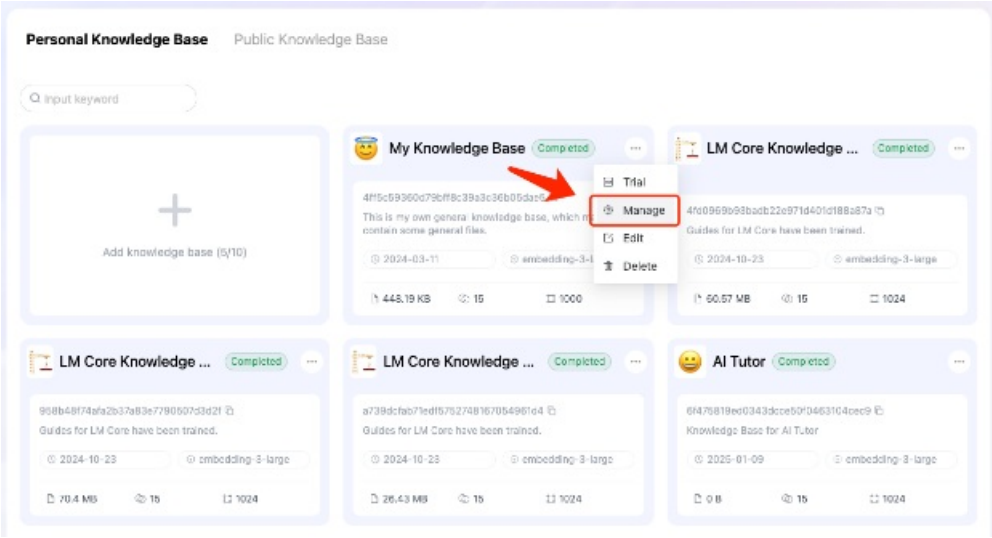


Step 3: Input the basic information



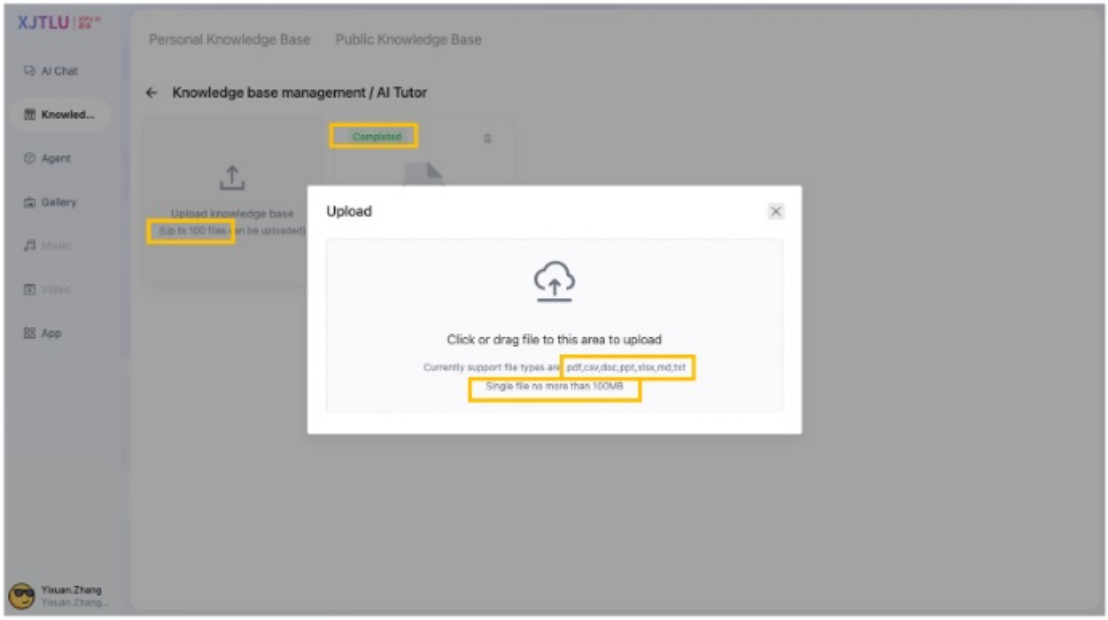
Step 4: Manage the files in the KB

Click the three-dot action button
Select the second option "Manage"



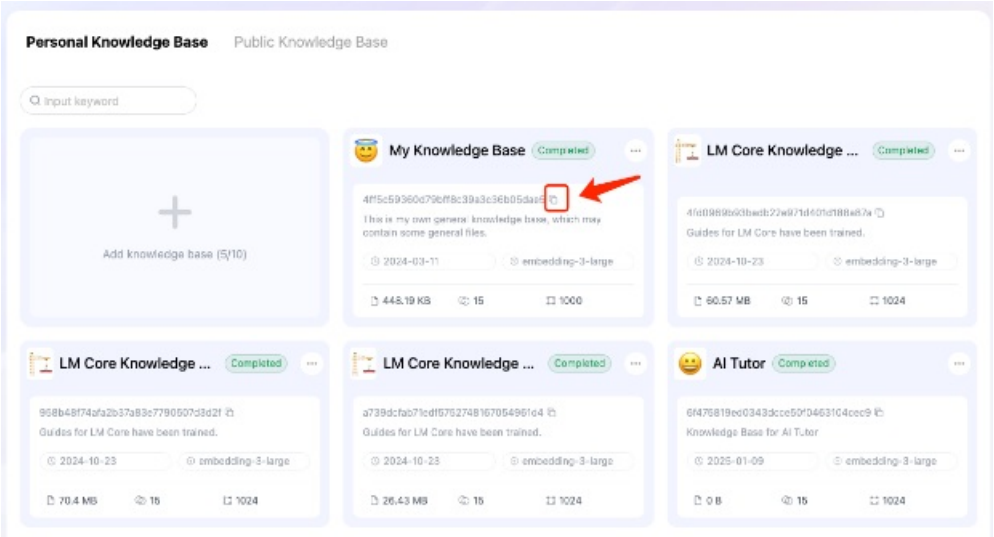
Step 5: Upload your files

Tips:
Each KB can only contain 100 files
Each file cannot exceed 100 MB
7 types of files are accepted: pdf, csv, doc, ppt, xlsx, md, txt
Please kindly wait for training completed



Step 6: Copy the Knowledge Base ID

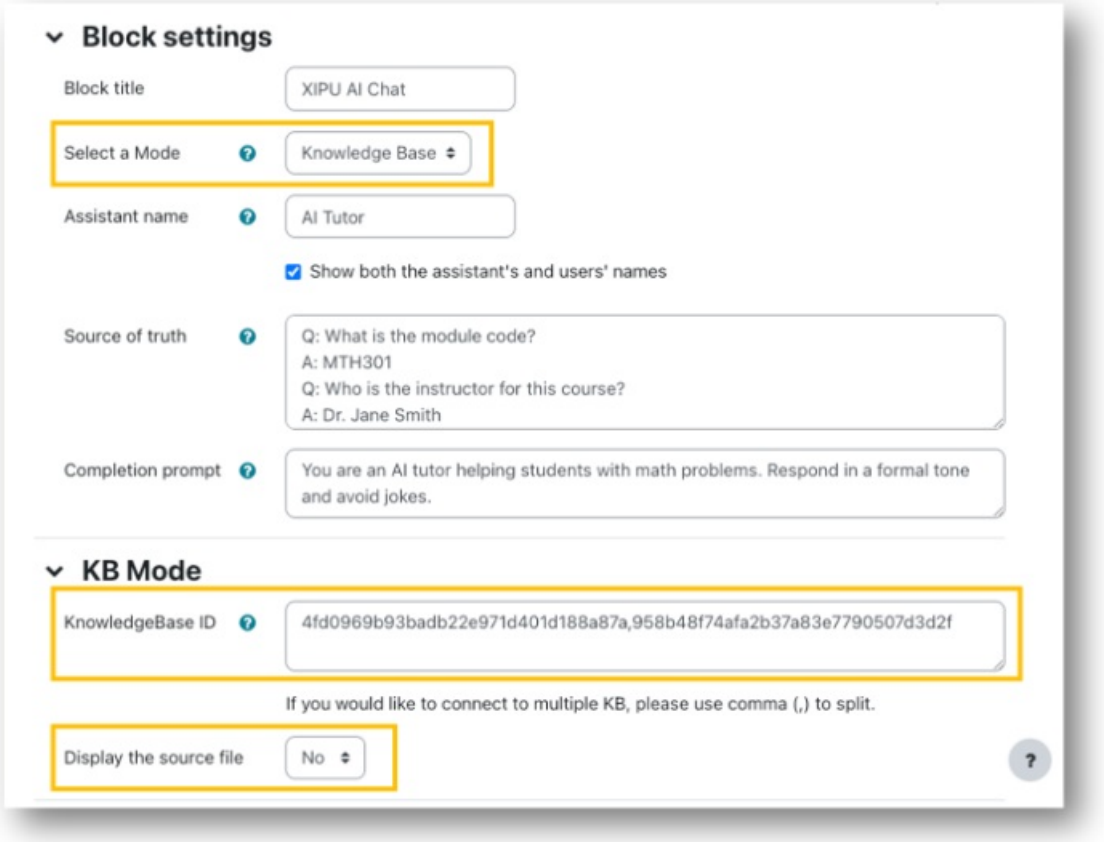
Click the “copy” button to copy your knowledge base id



Step 7: Link the Knowledge Base to the XIPU AI Chat Block

Please follow How to construct an AI Tutor (XIPU AI Chat block) on LM Core module page?to add the XIPU AI Chat Block on your module page.

Select "Knowledge Base" Mode;
Paste your KB IDs and use commas to split if you have multiple ones;
Choose whether to display your source file link to the users.



The "Source of Truth" and "Completion Prompt" can work under theKnowledge Base Mode.
