

# Ordering question type

An example of Ordering Question type

## Overview

Ordering question type allows students to drag the short sentences/images into the correct order according to the question.

## What to know

When creating the ordering question, you should make sure the question text is clearly described so that the students can know how to order the items.

## Table of Contents

- [Step 1: Access the Quiz activity where you want to create the question](#)
- [Step 2: Questions editing page](#)
- [Step 3: Add a new question](#)
- [Step 4: Choose a question type](#)
- [Step 5: General settings](#)
- [Step 6: Draggable items](#)
- [Step 7: Combined feedback \(Optional\)](#)
- [Step 8: Multiple tries](#)
- [Step 9: Tags \(Optional\)](#)
- [Step 10: Save changes](#)

### Step 1: Access the Quiz activity where you want to create the question

In your module area/course, click the link of the Quiz activity where you want to create a new Multiple Choice question.

## ▼ Topic 5

Example Quiz

Receive a grade

Opened: Wednesday, 8 November 2023, 1:31 PM

Note: If an appropriate Quiz activity doesn't exist in your module area/course, please see [Add a Quiz](#) for details of how to create one.

### Step 2: Questions editing page

1. Click the 'Questions' tab.

**Example Quiz**

Quiz Settings **Questions** Results Question bank More ▼

Receive a grade

Opened: Wednesday, 8 November 2023, 1:31 PM

Preview quiz

Attempts allowed: 1

### Step 3: Add a new question

1. On the following page, click the 'Add' link.
2. Click the 'a new question' link in the drop-down menu.

**Example Quiz**

Quiz Settings Questions Results Question bank More ▼

### Questions

Questions: 1 | This quiz is open

Maximum grade 100.00 Save

Repaginate Select multiple items Total of marks: 1.00

Page 1

1 [edit] [settings] The Loch Ness Monster is a type of? The Loch Ness Monster ... Always

Shuffle ?

Add ▼

- + a new question
- + from question bank
- + a random question

## Step 4: Choose a question type

1. Locate and select the Multiple choice question type from the pop-up window.
2. Click the 'Add' button.

## Step 5: General settings

Set the general information of the question by:

**General**

Category: Default for Chenhui's Test Module (1)

Question name: [Empty]

Question text: [Rich text editor with toolbar and 'Words:0' counter]

Question status: Ready

Default mark: 1

Category: Where you want the question to be saved.

Question name: It will be shown when you are searching the questions in question bank, but students can't see the question name.

Question text: It describes the question itself and students will see it when taking the quiz.

Default mark: Please set the default mark as 1. We can change the marks later when you are editing the whole quiz.

General feedback: [Rich text editor with toolbar and 'Words:0' counter]

ID number: [Empty]

Layout of items: Vertical

Item selection type: Select all items

Size of subset: All

Grading type: Absolute position

Grading details: Show

Number the choices?: No numbering

General feedback: General feedback is shown to the student after they have completed the question. Unlike specific feedback, which depends on the question type and what response the student gave, the same general feedback text is shown to all students. You can use the general feedback to give students a fully worked answer and perhaps a link to more information they can use if they did not understand the questions.

ID number: If used, the ID number must be unique within each question category. It provides another way of identifying a question which is sometimes useful, but can usually be left blank.

Layout of items: You can choose if the draggable items will be listed vertically or horizontally.

Item selection type: There are several item selection types for you to choose.

<p><u>Select all items</u> --- All the items you created will be shown and available for students to select.</p>	<p><u>Select a random subset of items</u> --- Should be set together with " <u>Size of subset</u> ". They determines how many items will be randomly shown from the list of items you created. The item sets will be different for each attempt.</p>	<p><u>Select a contiguous subset of items</u> --- Should be set together with " <u>Size of subset</u> ". The items close to each other will be shown.</p>
<p>Please order the number from small to large.</p> <p>A. 2 B. 3 C. 1 D. 4 E. 5</p>	<p>Please order the number from small to large.</p> <p>A. 3 B. 5 C. 2</p>	<p>Please order the number from small to large.</p> <p>A. 4 B. 5 C. 3</p>

Size of subset: It will be available when you are using "Select a random subset of items" or "Select a contiguous subset of items".

Grading type: It is very important that you choose the best grading type for your educational goals. You must choose the one that will better assess your students:

Grading details: You can choose if the students can see the grading details or not.

Number the choices?: It changes the number format for each options, such as using the "1, 2, 3..." or "a, b, c..."

## Step 6: Draggable items

The draggable items have to be created **in the correct order** :

The screenshot displays three vertically stacked 'Draggable item' editors. Each editor consists of a title (e.g., 'Draggable item 1'), a rich text editor with a toolbar containing icons for text formatting (bold, italic, underline, link, unlink, list, indent, outdent), a text input field, and a 'Remove HTML editor' button. The editors are arranged in a list, and a question mark icon is visible in the bottom right corner of the third editor.

## Step 7: Combined feedback (Optional)

Set the combined feedback for the question which will be show as the feedback according to students' grade of this question by:

**Combined feedback**

For any correct response

Your answer is correct.

Words:4

For any partially correct response

Your answer is partially correct.

Words:5

For any incorrect response

Your answer is incorrect.

Words:4

## Step 8: Multiple tries

When questions are run using the '*Interactive with multiple tries*' or '*Adaptive mode*' behaviour, so that the student will have several tries to get the question right, then this option will be useful to control how much they are penalised and what hint you will receive for each incorrect try :

**Multiple tries**

Penalty for each incorrect try 33.33333%

Hint 1

Words:0

Hint 2

Words:0

Add another hint

Penalty for each incorrect try:

The penalty is a proportion of the total question grade, so if the question is worth three marks, and the penalty is 0.3333333, then the student will score 3 if they get the question right first time, 2 if they get it right second try, and 1 of they get it right on the third try.

For some multi-part questions this scoring logic is applied separately to each part of the question. The details depend on the question type and can be complicated, but the principle is to give students credit for the knowledge they have demonstrated as fairly as possible.

Hint: It is the message you want the students to see when they are wrong, it will help them to select the right answer in the next attempt. You can create more than one hints according to the attempts the quiz allowed.

## Step 9: Tags (Optional)

If you are using tags, you can easily search for the question by the tag in the question bank.

The screenshot shows a section titled "Tags" with a downward arrow icon. Below the title, there is a label "Tags" and a dropdown menu currently set to "Any tags". To the right of the dropdown is a search input field with the placeholder text "Search" and a downward arrow icon.

## Step 10: Save changes

Please click the "Save changes and continue editing" or "Save changes" to save your changes.

The screenshot shows three buttons: a large blue button labeled "Save changes and continue editing", a smaller blue button labeled "Save changes", and a grey button labeled "Cancel".

Tips: You can also preview the questions by clicking:
