

# Create groups and grouping

An example of Grouping

## Overview:

This guide will show you how to create groups and grouping in your module.

## What to know:

In group projects, it is necessary to create groups and grouping. As it is quite common for a module to have several ways of organizing groups, such as the groups of lectures (e.g. EAP001-Lecture-Onsite-01), groups of tutorials (e.g. EAP001-Tutorial-Onsite-01), group project (e.g. Group 1). The teacher need to tell the system which collection of group should be used in the activity. Then it is the time to use grouping. You can regard a 'grouping' as a collection of groups.

## The different between groups and grouping:

Group: The member of groups are students.

Grouping: 'a collection of groups'. The member of grouping are groups, e.g. Group 1, Group 2, etc.
