

Random questions

An example of random questions

Overview:

This guide will show you how to add random questions into a Quiz activity.

What to know:

Random questions will allow the Quiz activity to randomly select questions from the Question Bank in the module, which makes a big contribution to prevent students from checking answers with each other. e.g. Student A may get Question 1 and 10 from the Question Bank, while Student B may get Question 4 and Question 7 from the Question Bank, as all these questions are randomly selected by the system.

Table of Contents

- [Step 1: Access the Quiz activity where you want to create the question](#)
- [Step 2: Edit quiz](#)
- [Step 3: Add a random question](#)
- [Step 4: Choose the category](#)
- [Step 5: Choose the number of random questions that need to be generated](#)
- [Step 6: Add random questions](#)
- [Step 7: Preview random questions](#)

Step 1: Access the Quiz activity where you want to create the question

In your module area/course, click the link of the Quiz activity where you want to create a new random question.

▼ Topic 1

QUIZ
Quiz 

Note: If an appropriate Quiz activity doesn't exist in your module area/course, please see [Add a quiz](#) for details on how to create one.

Step 2: Edit quiz

1. Click the Questions tab on the Quiz activity's main page.

 QUIZ

Choice question example

••

True/False question

Step 5: Choose the number of random questions that need to be generated

Choose the number of random questions you want to have in the Quiz activity.

E.g. As is shown in the screenshot below, this quiz will randomly choose 3 questions from the selected category.

Add a random question
