

Random questions

An example of random questions

Overview:

This guide will show you how to add random questions into a Quiz activity.

What to know:

Random questions will allow the Quiz activity to randomly select questions from the Question Bank in the module, which makes a big contribution to prevent students from checking answers with each other. e.g. Student A may get Question 1 and 10 from the Question Bank, while Student B may get Question 4 and Question 7 from the Question Bank, as all these questions are randomly selected by the system.

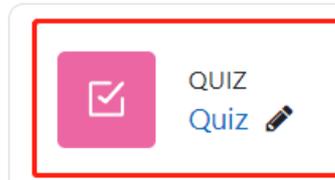

Table of Contents

- [Step 1: Access the Quiz activity where you want to create the question](#)
- [Step 2: Edit quiz](#)
- [Step 3: Add a random question](#)
- [Step 4: Choose the category](#)
- [Step 5: Choose the number of random questions that need to be generated](#)
- [Step 6: Add random questions](#)
- [Step 7: Preview random questions](#)

Step 1: Access the Quiz activity where you want to create the question

In your module area/course, click the link of the Quiz activity where you want to create a new random question.

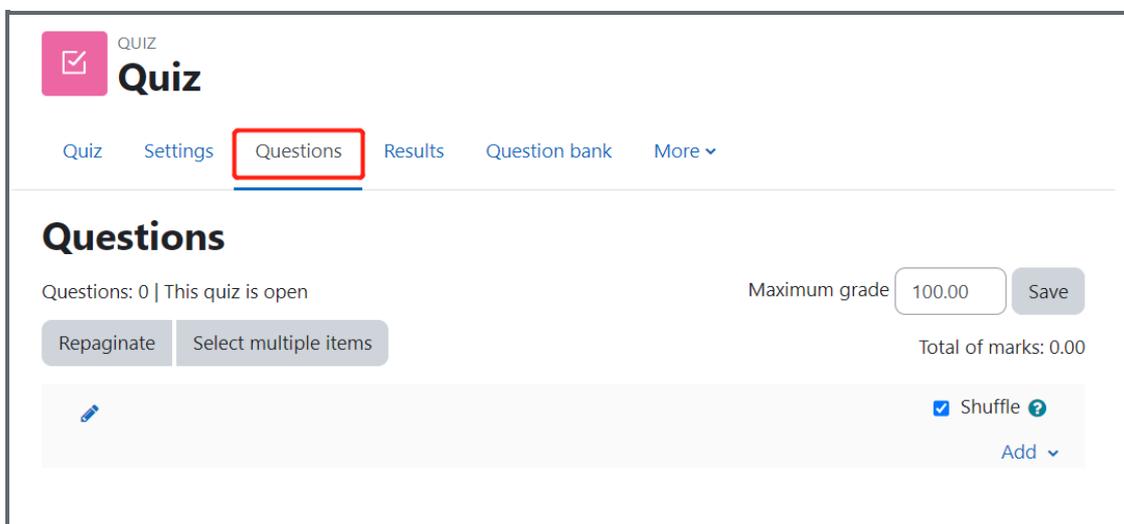

▼ Topic 1

Note: If an appropriate Quiz activity doesn't exist in your module area/course, please see [Add a quiz](#) for details on how to create one.

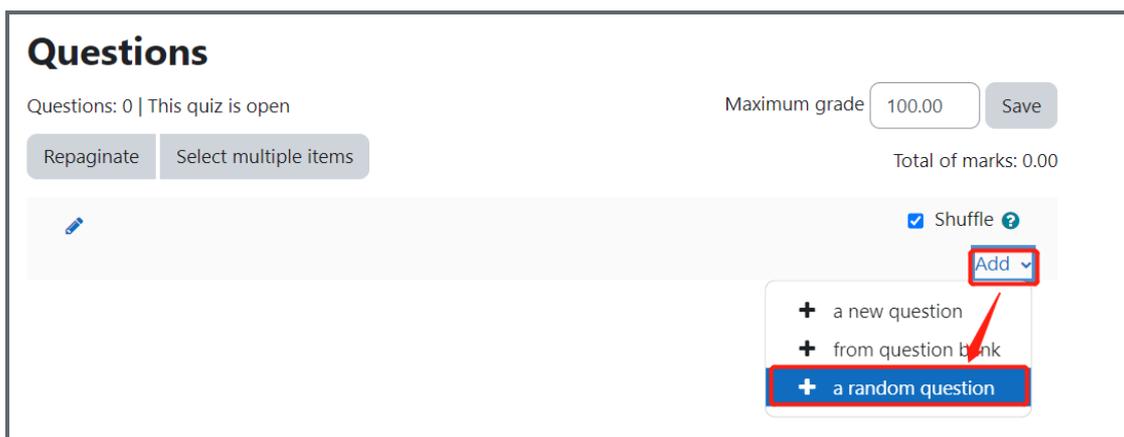

Step 2: Edit quiz

1. Click the Questions tab on the Quiz activity's main page.

A screenshot of the "Quiz Questions" page. At the top left is a pink square icon with a white checkmark and the word "QUIZ" above "Quiz". Below this are tabs: "Quiz", "Settings", "Questions" (highlighted with a red box), "Results", "Question bank", and "More". The main heading is "Questions". Below it, it says "Questions: 0 | This quiz is open". On the right, there is a "Maximum grade" input field with "100.00" and a "Save" button. Below that is "Total of marks: 0.00". There are buttons for "Repaginate" and "Select multiple items". At the bottom right, there is a "Shuffle" checkbox (checked) with a help icon, and an "Add" dropdown menu.

Step 3: Add a random question

1. On the following page, click the 'Add' link.
2. Click the 'a random question' link in the dropdown menu.

A screenshot of the "Quiz Questions" page, similar to the previous one, but with the "Add" dropdown menu open. The dropdown menu has three options: "+ a new question", "+ from question bank", and "+ a random question" (highlighted with a red box). A red arrow points from the "Add" button to the "a random question" option.

Step 4: Choose the category

In the pop-up window, choose the category where your random questions locate.

Add a random question at the end

- ☰ Choice question example
- True/False question

Step 5: Choose the number of random questions that need to be generated

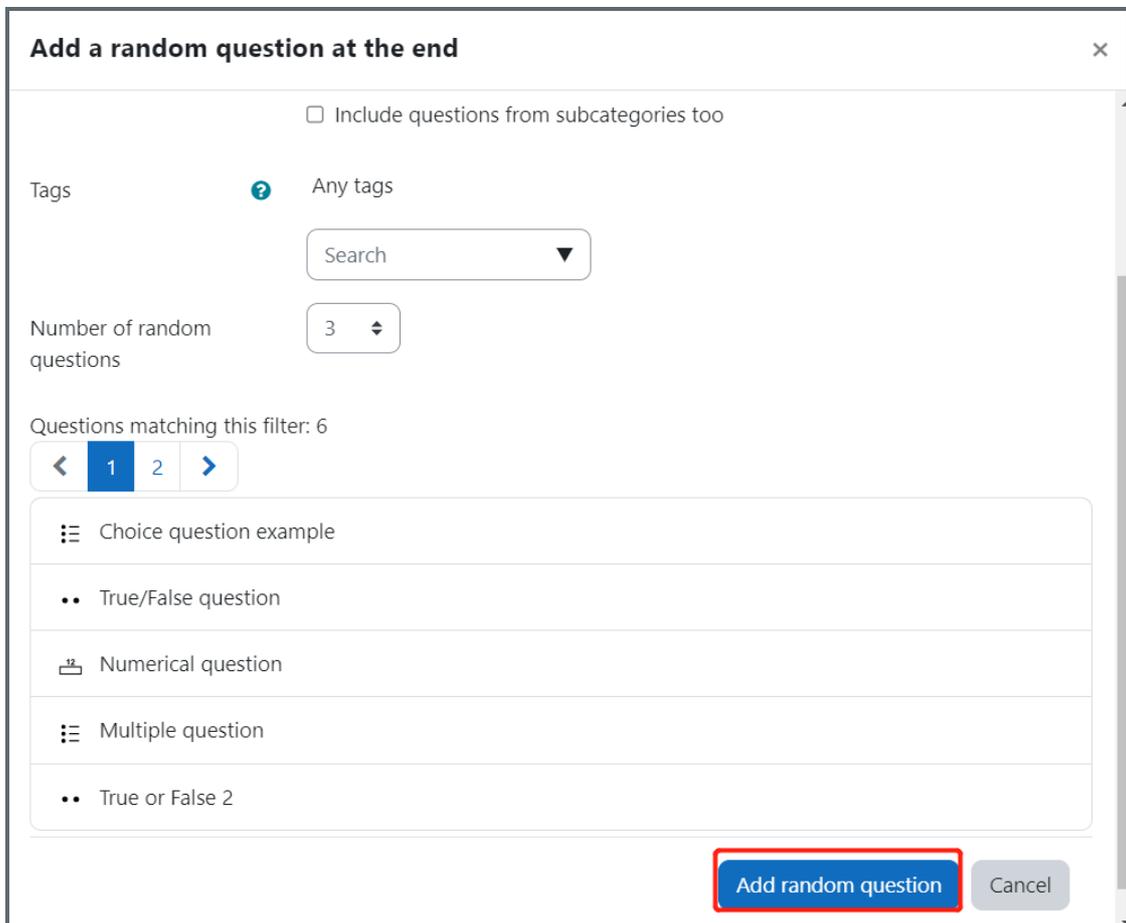

Choose the number of random questions you want to have in the Quiz activity.

E.g. As is shown in the screenshot below, this quiz will randomly choose 3 questions from the selected category.

Step 6: Add random questions

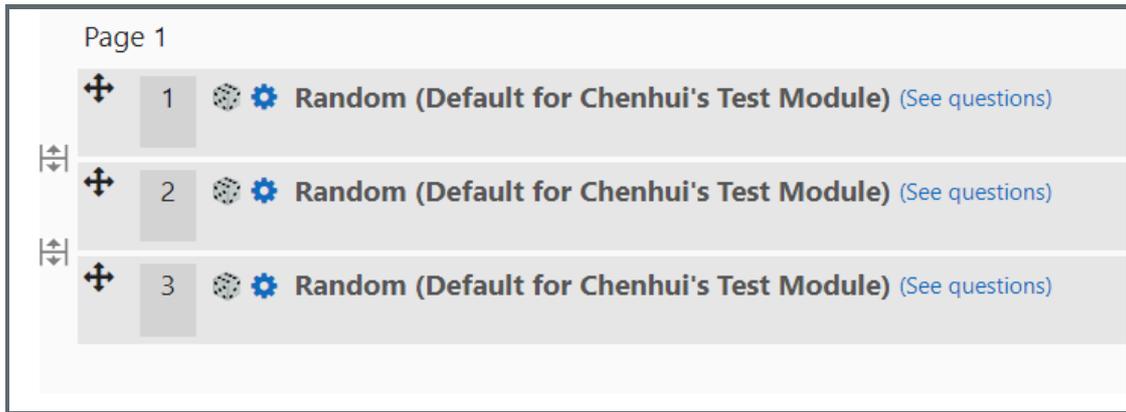

Click the 'Add random question' button to add the random questions.

Step 7: Preview random questions

Then, the random questions are created in the question list.

To preview the random questions, click the '(See questions)' link to preview the random questions that can be potentially selected .
