Step 3 - Define the levels in level up setting

An example of levels

Overview:

This guide will show you how to define the levels of your module. Please refer to the Level-up information portal for an example of the tool and best practices.

What to know:

"Level" refers to the character's progress of experience-based ability gain, in which every increment is equal to one level. In games, levels are often defined by missions or storylines. Once you complete one, you get access to the next, more difficult storyline. Curiosity and desire to achieve or 'conquer' further missions, make levels motivating.

In many tabletop and role-play (RPG) games, characters start as fairly untrained with a low level and a low number of experience points. When a sufficient amount of experience is obtained, the character "levels up", achieving the next level of character development.

Table of Contents

Step 1: Go to the level settings Step 2: Set the levels

Step 1: Go to the level settings

Navigate to the Level Up block and click the "setting" button:

| Level up! | Level up! | | | | | | | |
|------------------------------|---------------------------------|------------------------|--|--|--|--|--|--|
| Level 1 | | | | | | | | |
| | | 30 ^{xp} to go | | | | | | |
| Participate in experience po | the course to bints and leve | o gain el up! | | | | | | |
| RECENT REWARDS | | | | | | | | |
| info Lad | der Report | Settings | | | | | | |

On the setting page, please click the "Levels" tab on the top:

| Course settings | | | | | | | | | | |
|-----------------|----------------------------|-------------|--------|-----|--------|-------|---------|----------|------|--|
| Info | Ladder | Team ladder | Report | Log | Levels | Rules | Visuals | Settings | Plus | |
| General | | | | | | | | | | |
| Enable po | Enable points gain 😮 Yes 🗢 | | | | | | | | | |
| Enable in | fo page | ? Yes | \$ | | | | | | | |

Step 2: Set the levels

First, decide how many levels you are going to create and then update the settings in order to customise newly created levels.

Please bear in mind that the first level will always be the starting level with 0 experience points required. For each additional level, you can:

configure the number of points required to achieve this level define a custom level name include a brief description of the level

W Use the algorithm:

"Algorithm" will help you to create the levels and scores according to some rules. If you want to use it, please set the "Set points" to "Using algorithm".

Edit Algorithm base and Algorithm coefficient according to your needs. Then click "Save changes".

| Leve | els | | | | | | | | |
|-----------------|----------|-------------|----------|----------|------------|------------|-----------|----------|--------------|
| Info | Ladder | Team ladder | Report | Log | Levels | Rules | Visuals | Settings | Plus |
| View as Grid | Level co | Using algo | orithm 🗸 | Algorith | m base Alg | porithm co | efficient | | Save changes |
| | | | | | | | | | |

Now you can put the level names and level descriptions into the box as below:

| 1 |
|-------------------------------|
| Name Level 1 |
| Points required |
| Description No description |

Don't use the algorithm:

If you want to manually put all the level points, please choose Set points > 'Manually' .

| Levels | | | | | | | | | | | |
|-----------------|----------|-------------------------|--------|-----|--------|-------|---------|----------|--------------|--|--|
| Info | Ladder | Team ladder | Report | Log | Levels | Rules | Visuals | Settings | Plus | | |
| View as Grid | Level co | unt Set points Manually | ~ | | | | | | Save changes | | |
| | | | | | | | | | | | |

Then manually define the points for each level, you can also put in the level name and descriptions:

| 2 |
|-----------------|
| Name |
| Level 2 |
| Points required |
| 100 |
| Description |
| No description |

After you finish, please click 'Save changes'.

| Levels | | | | | | | | | | |
|---------------------|-----------|-------------|--------|-----|--------|-------|---------|----------|--------------|--|
| Info La | adder | Team ladder | Report | Log | Levels | Rules | Visuals | Settings | Plus | |
| View as I Grid V | Level cou | Manually | ~ | | | | | | Save changes | |
| | | | | | | | | | | |

Basic steps about using Level-Up to gamify your page:

- 1. Enable Completion tracking on the module
- 2. Add the level up Block
- 3. Define activity Completion
- 4. Define the levels in level up setting
- 5. Create badges Level up
- 6. Define Experience Point rules Level Up
