

How to update or import grades in the gradebook

254 Na Li Thu, Jan 11, 2024 Gradebook

23010 0

Overview:

This guide will show you how to update or import the grade information in the gradebook for any activities you've created on LM Core.

What to know:

The Gradebook is only accessible by module leaders, teachers and non-editing teachers. Students won't be able to access.

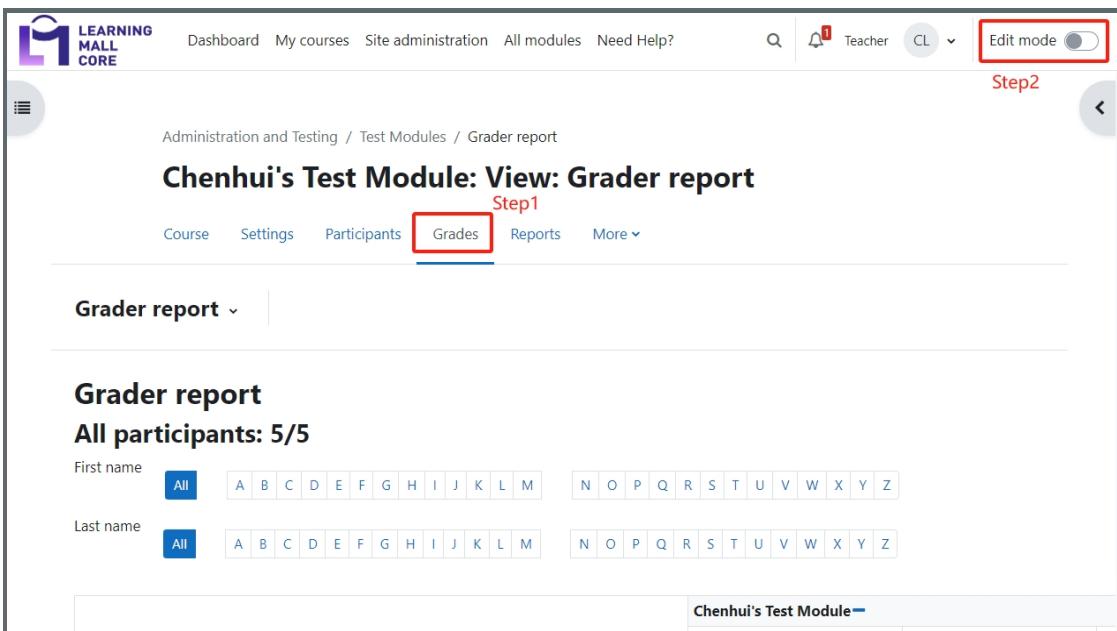

Table of Contents

- [Access to the Gradebook and Turn editing on](#)
- [Update the grades](#)
- [Altering the Grades Using Single View](#)
- [Import grade](#)
- [How to export the grades and make changes offline](#)

Access to the Gradebook and turn Edit mode on

All the grades for each student in your module can be found in the module gradebook. You can access the gradebook by clicking the "Grades" tab on the course-level menu inside your LM Core module page.

Turn "Edit mode" on.

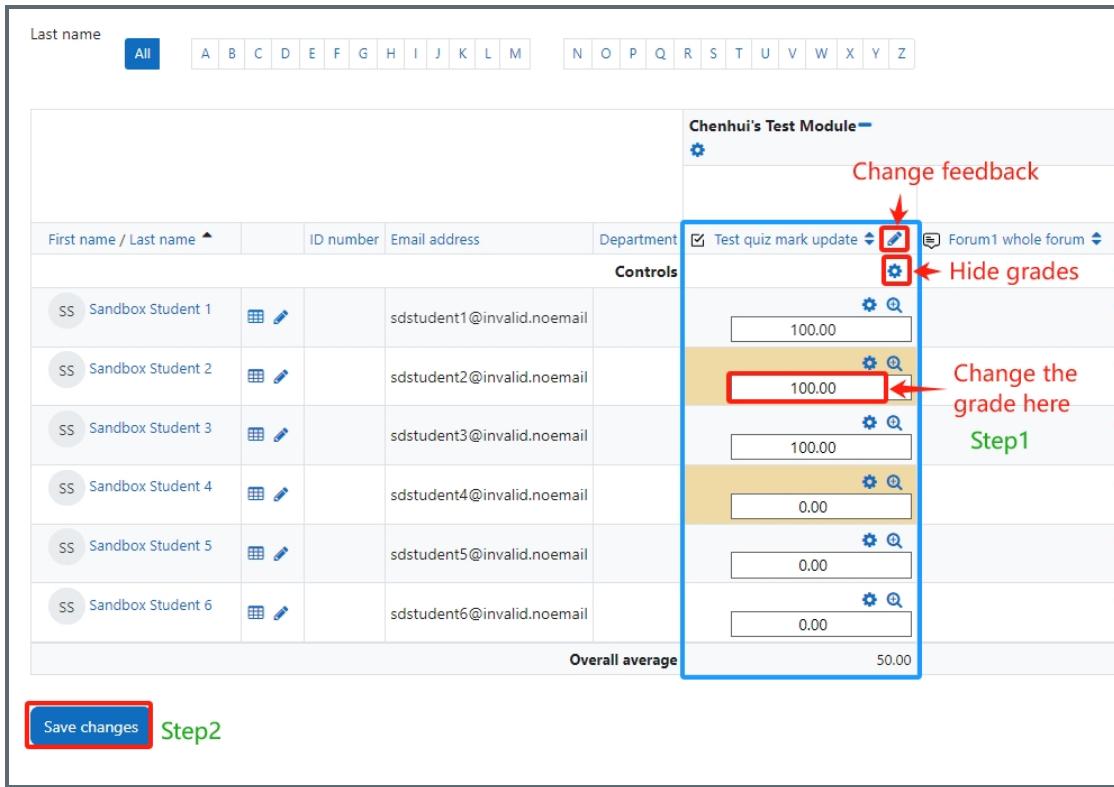

The screenshot shows the LM Core Gradebook interface. At the top, there is a navigation bar with links for Dashboard, My courses, Site administration, All modules, Need Help?, a search bar, a Teacher icon, and an 'Edit mode' toggle switch, which is highlighted with a red box. Below the navigation bar, the page title is 'Chenhui's Test Module: View: Grader report'. A 'Step1' label is visible. A navigation menu below the title includes Course, Settings, Participants, **Grades** (which is highlighted with a red box), Reports, and More. A 'Grader report' dropdown menu is open. The main content area displays a 'Grader report' for 'All participants: 5/5'. It shows two sets of dropdown menus for 'First name' and 'Last name', both with 'All' selected. The dropdowns for first names show letters A through Z, and the dropdowns for last names also show letters A through Z. At the bottom of the page, a footer bar displays 'Chenhui's Test Module'.

Update the grades

The report will appear with editable boxes containing each grade, so you can change many at once. This capability can be a real time-saver, but make sure to save at reasonable intervals or else a pageful of changes might be lost.

 Note: If you make changes here, they are then shown highlighted to indicate grades that have been manually changed.

Grades can be entered in multiple locations in LM Core. It will depend on what you are grading and where the best place is to enter the grades. There are advantages to each area. Entering grades from the Assignment has the advantage that it will send a notification to the student when the grade is submitted. This will not happen when the grade is edited from the grader report or single view screen.

Chenhui's Test Module

First name / Last name	ID number	Email address	Department	Controls
SS Sandbox Student 1		sdstudent1@invalid.noemail		
SS Sandbox Student 2		sdstudent2@invalid.noemail		
SS Sandbox Student 3		sdstudent3@invalid.noemail		
SS Sandbox Student 4		sdstudent4@invalid.noemail		
SS Sandbox Student 5		sdstudent5@invalid.noemail		
SS Sandbox Student 6		sdstudent6@invalid.noemail		

Overall average 50.00

Save changes Step2

Altering the Grades Using Single View

By clicking on the pencil icon beside any category name will bring up the editing screen for that grade category which will allow you to set the grade, its written feedback and a number of other attributes.

The single view interface allows you to enter grades in bulk for a specific grade item or a specific user. To change a specific grade or all grades, click on the Override checkbox by the specific grade row or use the Override All link to check every row. If you wish to override all grades with a set grade, choose the Bulk Insert grades and enter the grade that you wish to insert. You can select whether to fill the grade for just empty grades or for all grades from the dropdown list. Click on Save and you will now see in the Grader Report that all grades the specific item/user have been overridden with the grade/grades that you entered.

It is also possible to bulk insert a grade, which might be useful for example if you wish to give the grade 0 to all students who did not submit work.

Bulk insert grades Save

⚠ Note: Editing anything in the gradebook refers to editing the grades only and none of the available operations bears any relationship to editing the main module page i.e. the appearance of your module page cannot be influenced by anything you do in the gradebook.

Import grade

As the below screenshot shows, first please click the "Grades" menu to access the gradebook area, and then select the "Import" tab.

On the import page, the default option is CSV file.

You may ask, how can I get the CSV file format?

You can create the CSV file manually or you can get it from the export function.

Please check the next section about ["how to export grades"](#). Once you've exported the grades information in the excel format, you can open the excel file and save it in the .csv format for import. Please follow the steps in the export and offline marking section to put your grades in the excel file, and then save it in the .csv format.

If you have manually edited the grades in the gradebook, but you want to use the grade in the csv file to replace the existing grades, please enable the "force import" option and click "upload grades".

 Grades may be imported as a CSV or XML file, or by pasting from a spreadsheet. It is very complicated and not recommended for basic users.

F8 x ✓ f_x

	A	B	C	D	E	F	G
1	First name	Surname	ID number	Email address	Coursework: Coursework (Real)	Coursework: Coursework (Feedback)	Last downloaded from this course
2	Example	Student		student@noemail.invalid	80	good job	1620115135
3	Example	Student 2		student2@noemail.invalid	75	well done	1620115135
4	Example	Student3		student3@noemail.invalid	50	you can do better	1620115135
5							
6							

 On the import page, please make sure to use email address as the user identifier. If you leave it by default, your data upload will be a mess because the system doesn't know whose grade should be mapped.
In the "Grade item mappings" , please select the activity from the list to map with the activity on your csv file, so that the grades will be uploaded to this activity.

The screenshot shows the 'Import CSV' page with the 'Import' tab selected. The 'Import preview' section displays a table of student data. The 'Grade item mappings' section contains dropdowns for mapping fields: 'First name' (Ignore), 'Surname' (Ignore), 'ID number' (Ignore), 'Email address' (Ignore), 'Coursework: Coursework (Real)' (Coursework: Coursework), and 'Coursework: Coursework (Feedback)' (Feedback for Coursework: Coursework). A red box highlights the 'Email address' dropdowns in both sections, and another red box highlights the 'Coursework' dropdowns.

Example Student 2	75.00
Example Student3	50.00

Paste from the spreadsheet:

Grades may be pasted directly from a spreadsheet such as Excel or Libre Office:

- 1) Ensure you have the correct column names for your grades (e.g. the assignment title or manual grade) It might help to download and edit the relevant students and graded information by using the Grade export feature.
- 2) For the students you need either their username, their ID or their email address. Add the grades you need and copy the relevant section:

	A	B
1	username	London Tourist brochure
2	francesbanks231	78
3	lisadiaz378	92
4		

- 3) In your module, go to Grade >Import>Paste from spreadsheet and paste:

Chenhui's Test Module: Import: Paste from spreadsheet

The screenshot shows the 'Import' interface for 'Paste from spreadsheet'. At the top, there are tabs: Course, Settings, Participants, **Grades** (highlighted with a red box and an arrow), Reports, and More. Below these are buttons for 'Import' (with a dropdown menu) and 'Import as' (set to 'Paste from spreadsheet'). A large red box highlights the 'Paste from spreadsheet' section. Inside, there's a 'Data' area with a red box, an 'Encoding' dropdown set to 'UTF-8', a 'Verbose scales' dropdown set to 'Yes', a 'Preview rows' dropdown set to '10', and a 'Force import' checkbox. A red arrow points from the 'Preview rows' dropdown to the 'Upload grades' button, which is also highlighted with a red box. A question mark icon is in the bottom right corner.

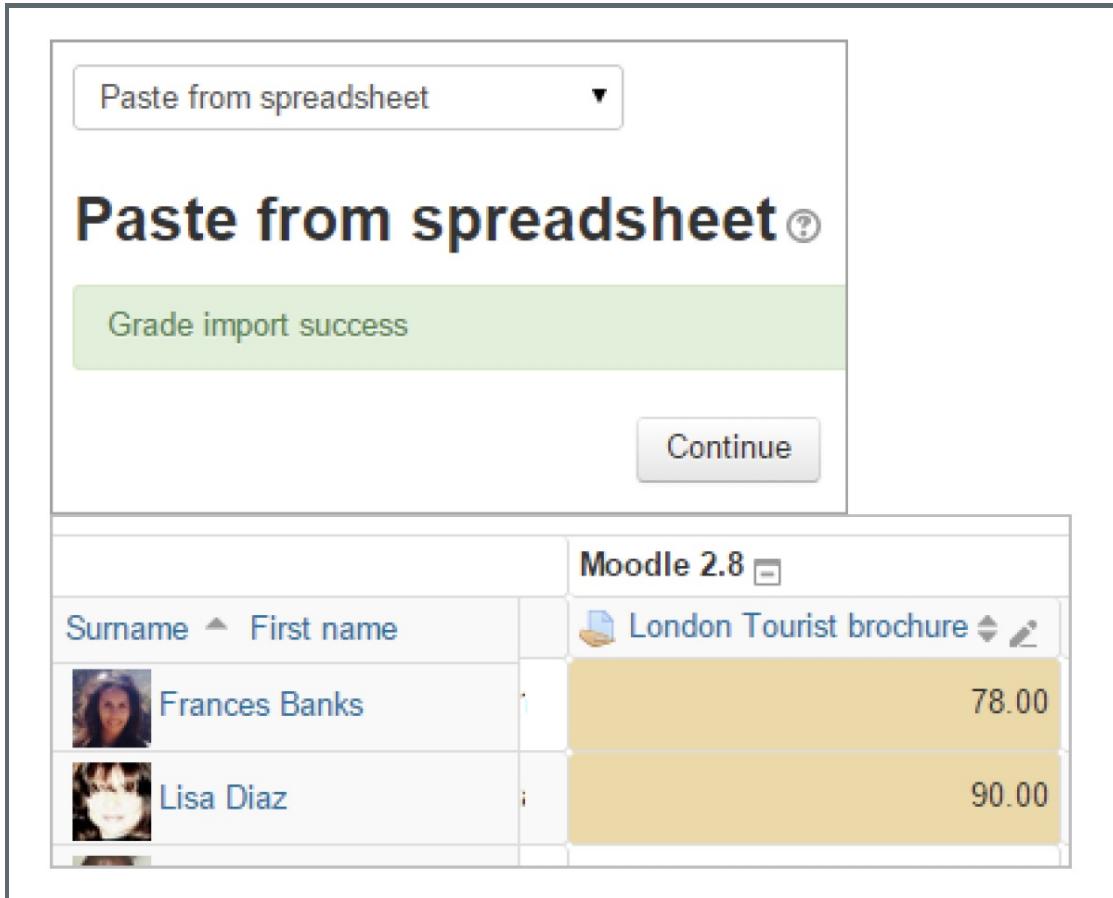

4) In the preview, ensure you match up the identifier you used for the students -so if you used 'username', ensure it maps to 'username'. Do the same for your graded activities:

The screenshot shows the 'Import preview' interface. At the top, there's a dropdown set to 'Paste from spreadsheet'. Below it is the 'Paste from spreadsheet' section with the same preview data as the previous screenshot. Under 'Import preview', there's a table with two rows:

username	London Tourist brochure
francesbanks231	78
lisadiaz378	90

Below the table are sections for 'Identify user by' and 'Grade item mappings'. In 'Identify user by', there are dropdowns for 'Map from' (set to 'username') and 'Map to' (set to 'Username'). In 'Grade item mappings', there are dropdowns for 'username' (set to 'Ignore') and 'London Tourist brochure' (set to 'Assignment: London Tourist brochure'). A red box highlights the 'Upload grades' button at the bottom.

5) If everything has been correctly mapped (See grade mapping above), you should get a success message and the grades

Paste from spreadsheet

Grade import success

Continue

Moodle 2.8	
Surname	First name
	Frances Banks
	Lisa Diaz
	78.00
	90.00

For other import formats, please click this link: [Other import formats](#)

The import file format is the same as the corresponding export format.

 Note 1: Grade import is equivalent to manual grading in the grader report. Thus, if grades for a particular LM Core activity such as an assignment are imported, they can no longer be edited via the assignment submission page.

Note 2: You cannot import grades above 100%, if you need, please contact us via

<https://knowledgebase.xjtu.edu.cn/contact.php>

Note 3: Importing feedback will also overwrite any grades that are linked to that assessment. Please include both feedback and grades for the activity when mapping and importing grades via CSV. If both columns are not included then all grades for that activity will be lost.

How to export the grades and make changes offline

Grades can be exported to e-Bridge format, Excel spreadsheet, OpenDocument spreadsheet, plain text file or XML file, or published via a URL.

If you want to export in Excel spreadsheet, please select the tab page "Excel spreadsheet". By default, the system will select all the activities of your module. You can untick the activities to just export the ones you want to export. The second screenshot is an example of the exported excel sheet.

In the export format options section, please double check each option to see if you want to include some extra content, like feedback.

For more details, please click this link for more information: [Export format](#).
