Question: What shall I do when I see the error message: "the group associated with this session has been deleted"

If you see this error message on your attendance page, it means, the student groups that bounded to the attendance must be deleted by someone.

You can check the log to see who has deleted the groups. Only module leader, teacher and admin have permission to delete groups.

Once the attendance groups been deleted, all the attendance recordings are gone.

LM and Registry have reminded all staff not to delete the attendance groups in various ways, including the e-learning coordinators meeting and the announcement: <https://core.xjtlu.edu.cn/mod/forum/discuss.php?d=22669>

The screenshot shows the 'Attendance for the course' page. At the top right, there is a settings icon (gear) with a dropdown arrow, which is highlighted with a red box. A settings menu is open, listing various options: Edit settings, Locally assigned roles, Permissions, Check permissions, Filters, Logs (highlighted with a red box), Backup, and Restore. Below the menu, the 'Sessions' section shows a table with one row. The 'Type' column for this row contains the error message: 'The group associated with this session has been deleted'. The 'Description' column for this row contains 'Lecture, HSG19'.

#	Date	Time	Type	Description	Actions
1	Mon 15 Mar 2021	19:00 - 20:00	The group associated with this session has been deleted	Lecture, HSG19	

To solve the problem, you can contact your departmental secretary to help you to recreate the deleted group, teachers don't have this permission, only the departmental secretary has permission.

For the user guide, please check the bulk enroll students part of this guide: [How to bulk enroll student in groups](#)

Please make sure the recreated group name and group members are the same as the deleted groups.

After re-creating the group, please inform [timetables@xjtlu.edu.cn](mailto:timetables@xjtlu.edu.cn) .

LM will wait for timetables colleagues to send us the attendance session and then LM can recreate the sessions for you.

After the session re-creation, you can follow this user guide to upload all the missing attendance record manually: [How to upload attendance recordings](#)
