Download module content

274 Yexiang Wu Thu, Mar 14, 2024 Module management 16932 0

An example of download the course content

Overview:

This guide will show you how to enable the feature to allow students to download all the module content.

What to know:

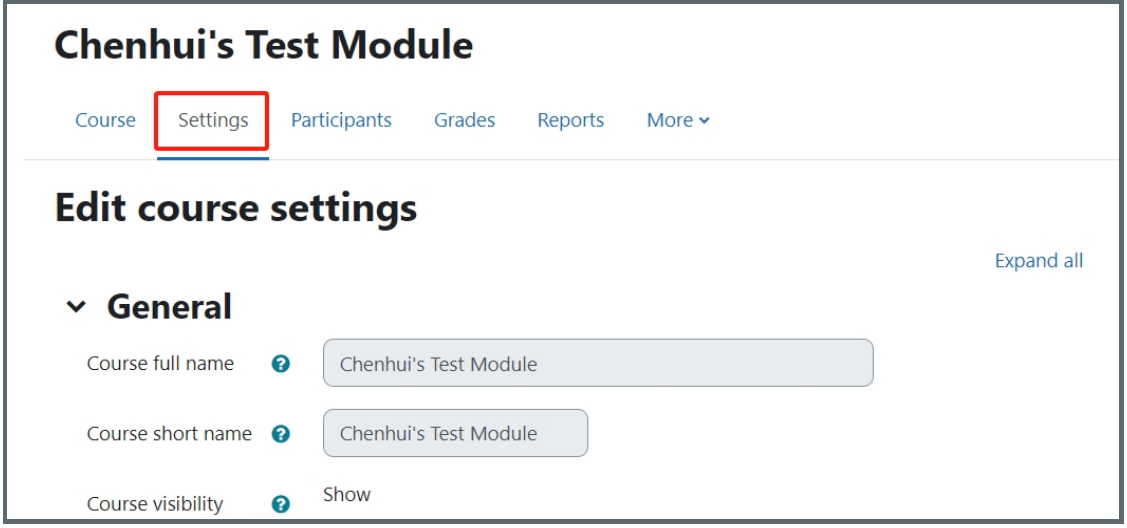

It is a function which teachers have to set before students can do it.

Table of Contents

Step 1: Go to course administration
Step 2: Enable to function
Step 3: Save your change
Step 4: Instruct your students to download the content

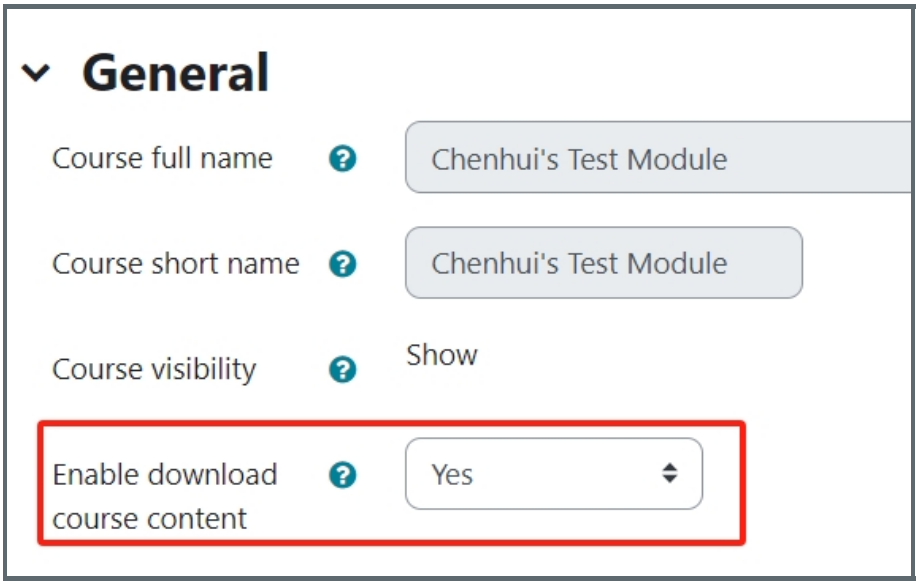

Step 1: Go to the "Settings" of your module

Please click the "Settings" tab on the course-level menu.

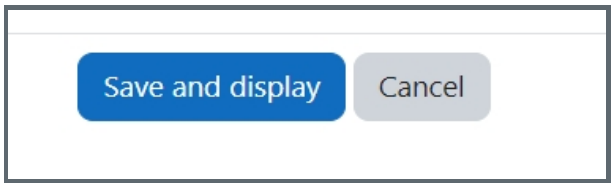

Step 2: Enable to function

Navigate to "Enable download course content", and change it to "Yes" .

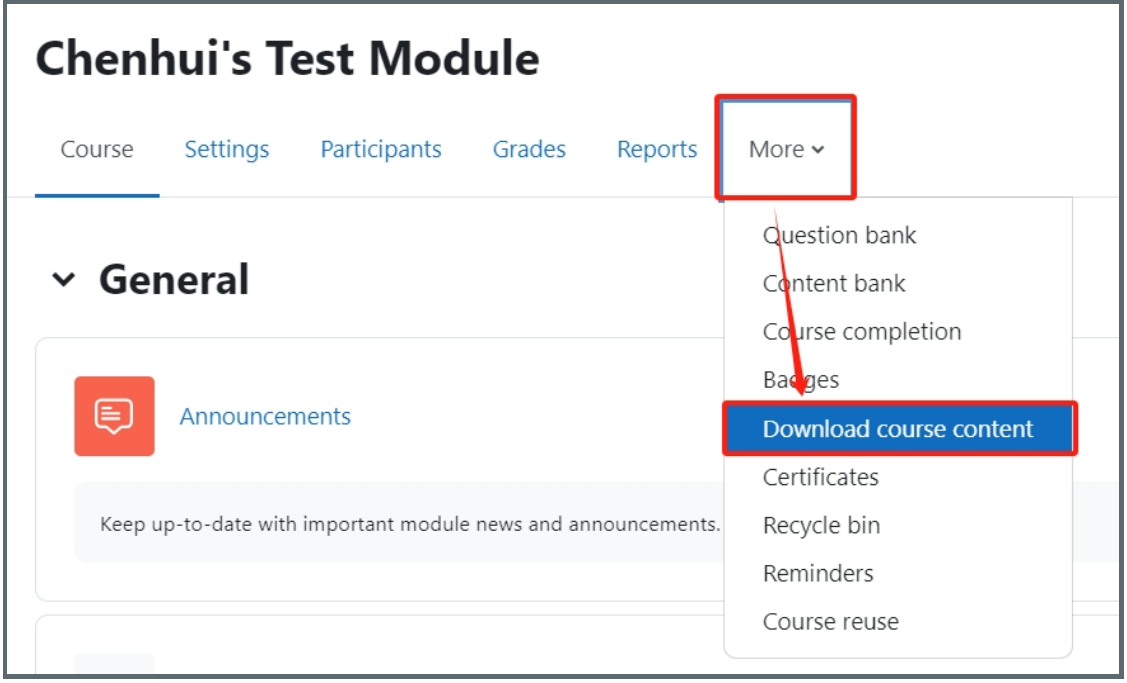

Step 3: Save your change

Step 4: Download the module content

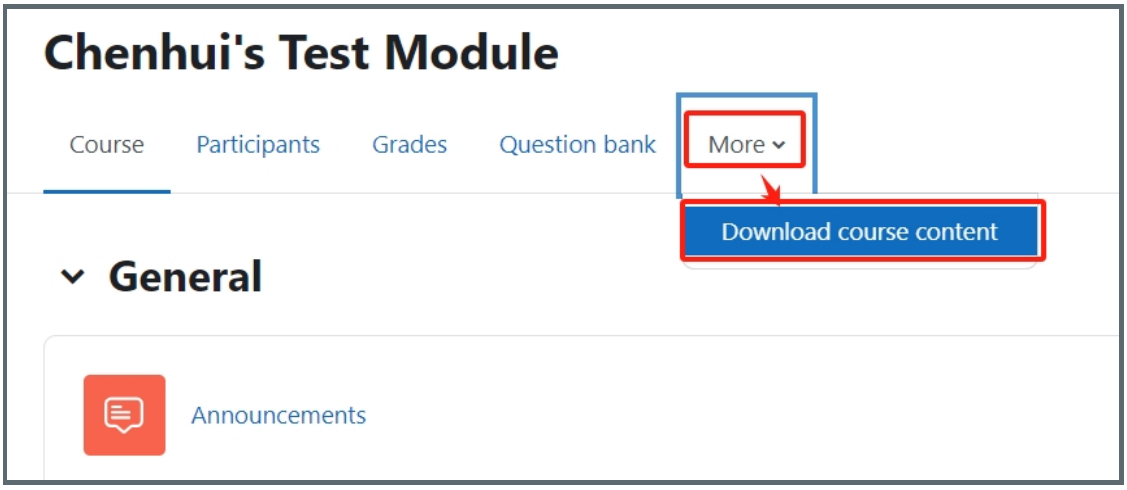

For teachers:

Please click the More tab at the top of the page. Then select 'Download course content' item in the dropdown menu to download the content.

For students:

Please ask the students to visit your module again. Now they will be able to see a button "Download course content" under "More". By clicking the button, students will be able to download the course content to their own computer.
