

# Download module content

An example of download the course content

## Overview:

This guide will show you how to enable the feature to allow students to download all the module content.

## What to know:

It is a function which teachers have to set before students can do it.

## Table of Contents

[Step 1: Go to course administration](#)

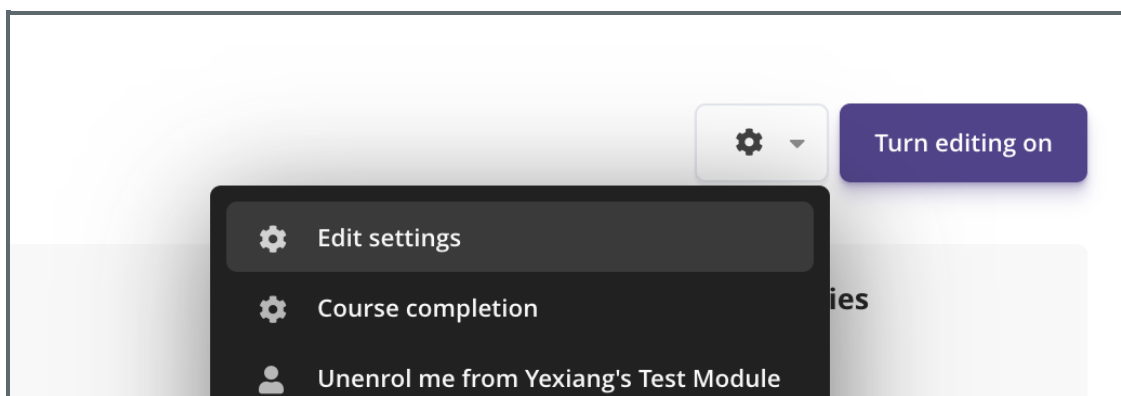

[Step 2: Enable to function](#)

[Step 3: Save your change](#)

[Step 4: Instruct your students to download the content](#)

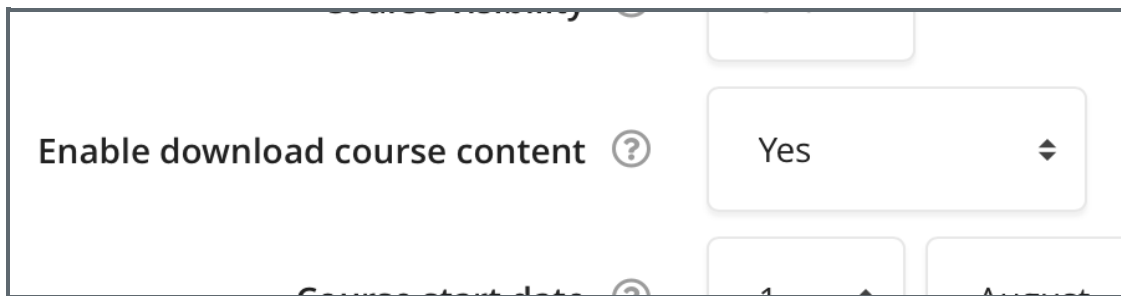

### Step 1: Go to course administration

Please click the gear button on the top right, then go to Edit setting:

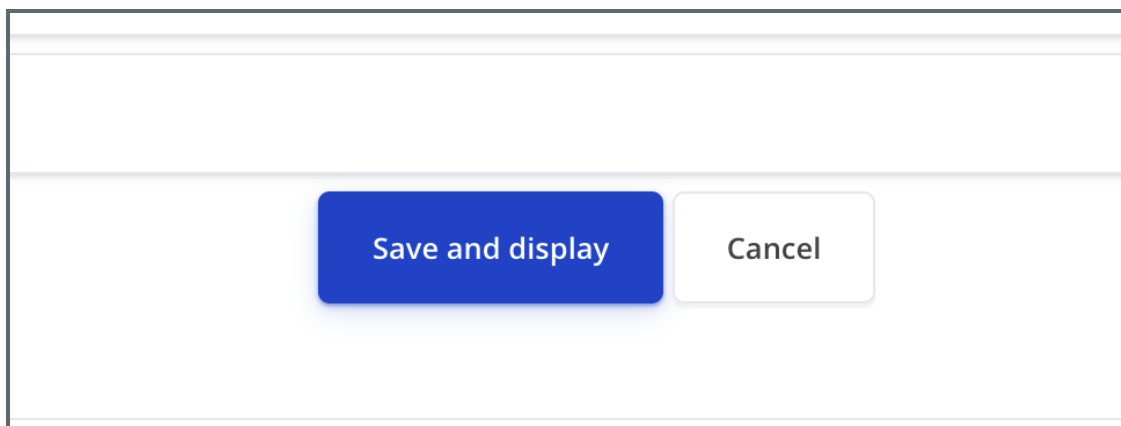

### Step 2: Enable to function

Navigate to "Enable download course content", and change it to "Yes" .

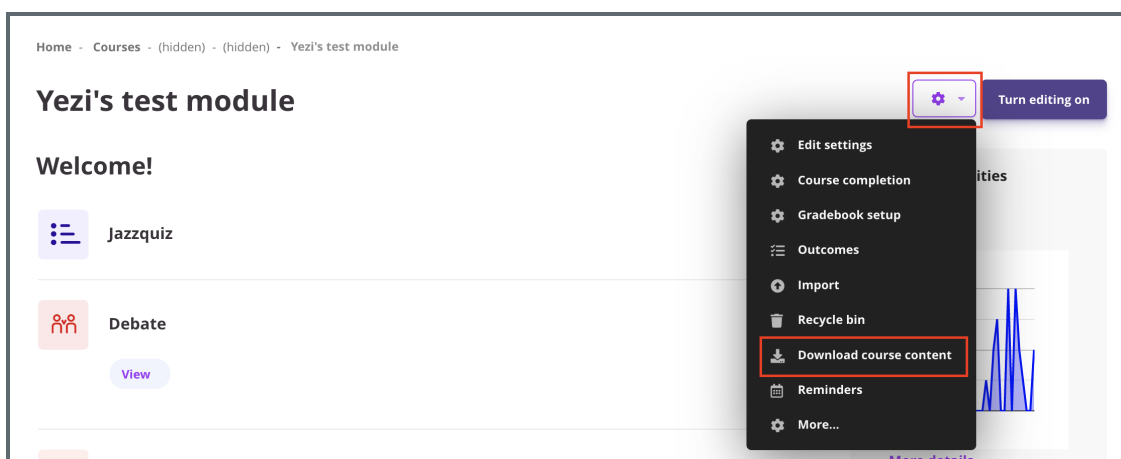

### Step 3: Save your change

### Step 4: Download the module content

#### For teachers:

Please click the Edit icon at the top of the page. Then select 'Download course content' item in the dropdown menu to download the content.

#### For students:

Please ask the students to visit your module again. Now they will be able to see a button on the top "Download course content". By clicking the button, students will be able to download the course content to their own computer.
