

# Drag and drop onto image

An example of Drag and drop onto image question type

## Overview:

This guide will show you how to create a Drag and drop onto image question type. It allows students to drag words, images or both from a list and drop them into pre-defined gaps on a base image.

## What to know:

The drag and drop to image questions type need to define the drop zone which will be visible to students.

## Table of Contents

- [Step 1: Access the Quiz activity where you want to create the question](#)
- [Step 2: Click the 'Questions' tab.](#)
- [Step 3: Add a new question](#)
- [Step 4: Choose a question type](#)
- [Step 5: General settings](#)
- [Step 6: Preview](#)
- [Step 7: Draggable items](#)
- [Step 8: Drop zones](#)
- [Step 9: Combined feedback \(Optional\)](#)
- [Step 10: Multiple tries](#)
- [Step 11: Tags \(Optional\)](#)
- [Step 12: Save changes](#)

Step 1: Access the Quiz activity where you want to create the question

In your module area/course, click the link of the Quiz activity where you want to create a new Multiple Choice question.

## ▼ Topic 5

Example Quiz

Receive a grade

**Opened:** Wednesday, 8 November 2023, 1:31 PM

Note: If an appropriate Quiz activity doesn't exist in your module area/course, please see [Add a Quiz](#) for details of how to create one.

### Step 2: Click the 'Questions' tab.

1. Click the 'Questions' tab.

The screenshot shows the 'Example Quiz' interface. At the top left is a pink square icon with a white checkmark. To its right is the title 'Example Quiz'. Below the title is a horizontal navigation bar with five tabs: 'Quiz', 'Settings', 'Questions', 'Results', and 'Question bank'. The 'Questions' tab is highlighted with a red rectangular box. To the right of the 'Question bank' tab is a 'More' dropdown menu. Below the navigation bar is a light gray bar containing a 'Receive a grade' button. Underneath this bar is a light gray box with the text 'Opened: Wednesday, 8 November 2023, 1:31 PM'. At the bottom left of the interface is a blue button labeled 'Preview quiz'. Below the button, the text 'Attempts allowed: 1' is displayed.

### Step 3: Add a new question

1. On the following page, click the 'Add' link.
2. Click the 'a new question' link in the drop-down menu.

# Example Quiz

Shuffle

**Add** ▾

- + a new question
- + from question bank
- + a random question

### Step 4: Choose a question type

1. Locate and select the Drag and drop onto image question type from the pop-up window.
2. Click the 'Add' button.

## Choose a question type to add

Calculated simple

CodeRunner

Drag and drop into text

Drag and drop markers

Drag and drop onto image

Drag-and-Drop Matching

Embedded answers (Cloze)

Essay (auto-grade)

Gapfill

Matrix/Kprime

Ordering

Images or text labels are dragged and dropped into drop zones on a background image.

Note: This question type is not accessible to users who are visually impaired.

**Add** Cancel

## Step 5: General settings

Set the general information of the question by:

The screenshot shows the 'General' settings panel for a question. It includes the following fields and options:

- Category:** A dropdown menu set to 'Default for Chenhui's Test Module (1)'. There is an 'Expand all' link in the top right corner.
- Question name:** An empty text input field with a red information icon to its left.
- Question text:** A rich text editor with a toolbar containing icons for undo, redo, text color, background color, bold, italic, underline, link, unlink, bulleted list, numbered list, decrease indent, increase indent, link, and unlink. Below the toolbar is a large text area with a 'Words:0' counter at the bottom left.
- Question status:** A dropdown menu set to 'Ready'.
- Default mark:** A text input field containing the number '1' with a red information icon to its left.
- A question mark icon in a grey circle is located in the bottom right corner of the panel.

**Category:** Where you want the question to be saved.

**Question name:** It will be shown when you are searching the questions in question bank, but students can't see the question name.

**Question text:** Put the question description here to let students know what to do.

**Default mark:** Please set the default mark as 1. We can change the marks later when you are editing the whole quiz.

The screenshot shows the 'General feedback' and 'ID number' settings. It includes the following fields and options:

- General feedback:** A rich text editor with a toolbar containing icons for undo, redo, text color, background color, bold, italic, underline, link, unlink, bulleted list, numbered list, decrease indent, increase indent, link, and unlink. Below the toolbar is a large text area with a 'Words:0' counter at the bottom left. There is a blue question mark icon to the left of the text area.
- ID number:** An empty text input field with a blue question mark icon to its left.

**General feedback:** General feedback is shown to the student after they have completed the question. Unlike specific feedback, which depends on the question type and what response the student gave, the same general feedback text is shown to all students. You can use the general feedback to give students a fully worked answer and perhaps a link to more information they can use if they did not understand the questions.

**ID number:** If used, the ID number must be unique within each question category. It provides another way of identifying a question which is sometimes useful, but can usually be left blank.

## Step 6: Preview

This the place where you can upload the background image and preview the layout of the question when you are editing the drop zone:

Upload the background image: Click the button "Choose a file" or drag the image to the blue dotted area to upload the image.

## Step 7: Draggable items

1. Set the answers/draggable items for the question:

Shuffle drag items each time question is attempted: You can enable/disable the function of shuffle.

Draggable item type: Select text or image you will use as the draggable item in this question.

Group: Items in different groups will be in a new list.

Unlimited: If it is enabled, it means students can drag the same item for unlimited times to different zone.

Choose file/drag a file: Upload image if you are using image as the draggable item.

Text: Put the text in for the item, if you are using the text as the draggable item.

2. Click the button below to add more items:

## Step 8: Drop zones

This is the place where you can upload the background image and preview the layout of the question when you are editing the drop zone.

1. Select the Draggable item for each Drop zone:

▼ Drop zones			
Drop zone 1	Left <input type="text" value="68"/>	Top <input type="text" value="91"/>	Draggable item <input type="text" value="1. North pole"/> Text <input type="text"/>
Drop zone 2	Left <input type="text" value="294"/>	Top <input type="text" value="89"/>	Draggable item <input type="text" value="2. South pole"/> Text <input type="text"/>

2. Go up background image, move the items to the correct area (The coordinates of drop zone will be auto updated based your move in this step):

## Step 9: Combined feedback (Optional)

Set the combined feedback for the question which will be show as the feedback according to students' grade of this question by:

▼ Combined feedback	
For any correct response	<div style="border: 1px solid #ccc; padding: 5px;"> <p><b>1</b> <input type="text" value="T"/> <input type="text" value="B"/> <input type="text" value="I"/> <input type="text" value="U"/> <input type="text" value="G"/></p> <p>Your answer is correct.</p> <p><small>Words:4</small></p> </div>
For any partially correct response	<div style="border: 1px solid #ccc; padding: 5px;"> <p><b>1</b> <input type="text" value="T"/> <input type="text" value="B"/> <input type="text" value="I"/> <input type="text" value="U"/> <input type="text" value="G"/></p> <p>Your answer is partially correct.</p> <p><small>Words:5</small></p> </div>
Options	<input checked="" type="checkbox"/> Show the number of correct responses once the question has finished
For any incorrect response	<div style="border: 1px solid #ccc; padding: 5px;"> <p><b>1</b> <input type="text" value="T"/> <input type="text" value="B"/> <input type="text" value="I"/> <input type="text" value="U"/> <input type="text" value="G"/></p> <p>Your answer is incorrect.</p> </div>

## Step 10: Multiple tries

When questions are run using the 'Interactive with multiple tries' or 'Adaptive mode' behaviour, so that the student will have several tries to get the question right, then this option will be useful to control how much they are penalised and what hint you will receive for each incorrect try :

**Multiple tries**

Penalty for each incorrect try

Hint 1

Hint 1 options  Options  Clear incorrect responses  Show the number of correct responses

Hint 2

Hint 2 options  Options  Clear incorrect responses  Show the number of correct responses

Penalty for each incorrect try:

The penalty is a proportion of the total question grade, so if the question is worth three marks, and the penalty is 0.3333333, then the student will score 3 if they get the question right first time, 2 if they get it right second try, and 1 if they get it right on the third try.

For some multi-part questions this scoring logic is applied separately to each part of the question. The details depend on the question type and can be complicated, but the principle is to give students credit for the knowledge they have demonstrated as fairly as possible.

Hint: It is the message you want the students to see when they are wrong, it will help them to select the right answer in the next attempt. You can create more than one hints according to the attempts the quiz allowed.

Hint options: There are some options of automatic response, such as clear incorrect responses and show the number of correct response.

## Step 11: Tags (Optional)

If you are using tags, you can easily search for the question by the tag in the question bank.

**Tags**

Tags

## Step 12: Save changes

Please click the "drag and drop onto image" or "Save changes" to save your changes.

Save changes and continue editing
