# Drag and drop matching

An example of Drag and drop matching question type

#### Overview:

This guide will show you how to create a Drag and drop matching question type. It allows students to drag the items close to the related question.

#### What to know:

Drag and drop matching question type can support different types of content including text, image, audio and video.

# Table of Contents

Step 1: Access the Quiz activity where you want to create the question

Step 2: Click the 'Questions' tab.

Step 3: Add a new question

Step 4: Choose a question type

Step 5: General settings

Step 6: Answers

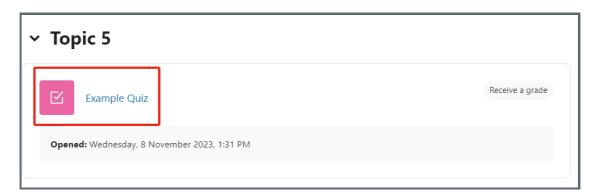

Step 7: Combined feedback (Optional)

Step 8: Multiple tries Step 9: Tags (Optional)

Step 10: Save changes

## Step 1: Access the Quiz activity where you want to create the question

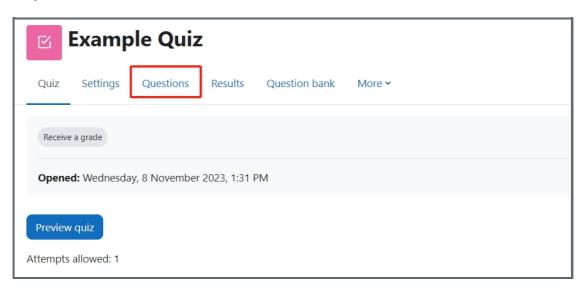

In your module area/course, click the link of the Quiz activity where you want to create a new Multiple Choice question.

Note: If an appropriate Quiz activity doesn't exist in your module area/course, please see Add a Quiz for details of how to create one.

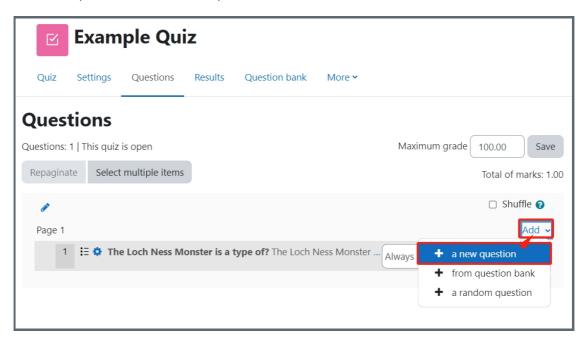

#### Step 2: Click the 'Questions' tab.

1. Click the 'Questions' tab.

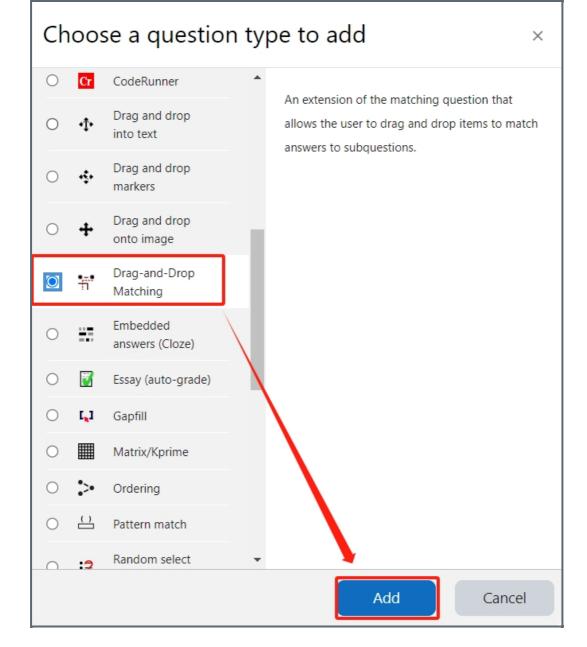

#### Step 3: Add a new question

- 1. On the following page, click the 'Add' link.
- 2. Click the 'a new question' link in the drop-down menu.

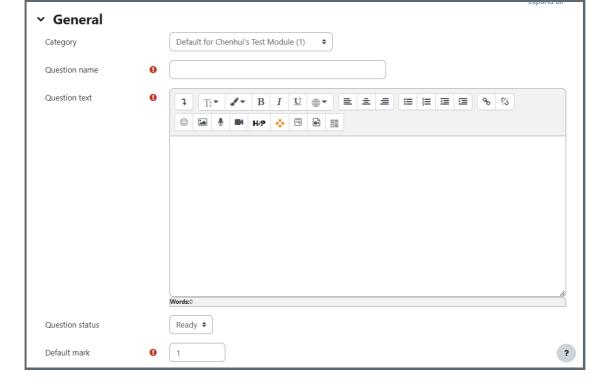

#### Step 4: Choose a question type

- 1. Locate and select the Drag and drop matching question type from the pop-up window.
- 2. Click the 'Add' button.

Step 5: General settings

Set the general information of the question by:

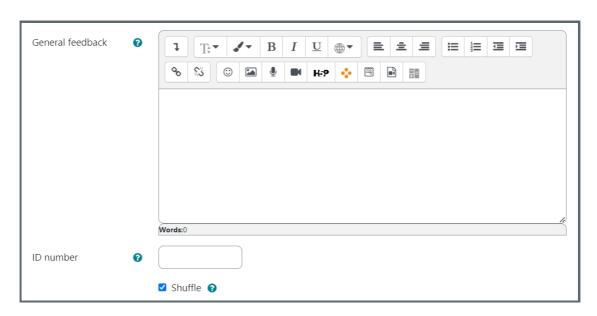

Category: Where you want the question to be saved.

Question name: It will be shown when you are searching the questions in question bank, but students can't see the question name.

Question text: Put the question description here to let students know what to do.

Default mark: Please set the default mark as 1. We can change the marks later when you are editing the whole quiz.

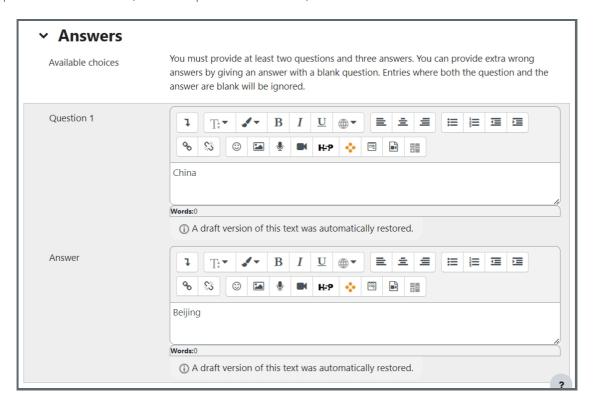

General feedback: General feedback is shown to the student after they have completed the question. Unlike specific feedback, which depends on the question type and what response the student gave, the same general feedback text is shown to all students. You can use the general feedback to give students a fully worked answer and perhaps a link to more information they can use if they did not understand the questions.

ID number: If used, the ID number must be unique within each question category. It provides another way of identifying a question which is sometimes useful, but can usually be left blank.

Shuffle: If enabled, the order of the answers will be shuffled for each new attempt.

.......

Type the questions and answers (at least 2 questions in needed):

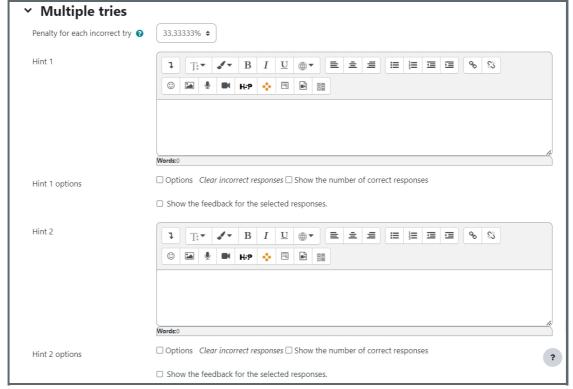

Step 7: Combined feedback (Optional)

Set the combined feedback for the question which will be show as the feedback according to students' grade of this question by:

#### Step 8: Multiple tries

When questions are run using the 'Interactive with multiple tries' or 'Adaptive mode' behaviour, so that the student will have several tries to get the question right, then this option will be useful to control how much they are penalised and what hint you will receive for each incorrect try:

Penalty for each incorrect try:

The penalty is a proportion of the total question grade, so if the question is worth three marks, and the penalty is 0.3333333, then the student will score 3 if they get the question right first time, 2 if they get it right second try, and 1 of they get it right on the third try.

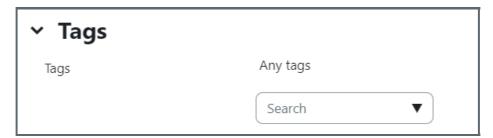

For some multi-part questions this scoring logic is applied separately to each part of the question. The details depend on the question type and can be complicated, but the principle is to give students credit for the knowledge they have demonstrated as fairly as possible.

Hint: It is the message you want the students to see when they are wrong, it will help them to select the right answer in the next attempt. You can create more than one hints according to the attempts the quiz allowed.

Hint options: There are some options of automatic response, such as clear incorrect responses and show the number of correct response.

## Step 9: Tags (Optional)

If you are using tags, you can easily search for the question by the tag in the question bank.

### Step 10: Save changes

Please click the "Save changes and continue editing" or "Save changes" to save your changes.

Tips: You can also preview the questions by clicking:
