An example of deleted files in Recycle Bin

Overview:

This guide will show you how to retrieve the files that have been deleted by mistake.

What to know:

This guide is applicable to both teachers and students.

Table of Contents

[Step 1: Delete the file by mistake](#)

[Step 2: Locate the Recycle Bin](#)

[Step 3: Restore the deleted file](#)

[Step 4: Content retention period in Recycle Bin](#)

Step 1: Delete the file by mistake

If you delete any content from the module area by mistake, you can always retrieve them in the recycle bin.

Step 2: Locate the Recycle Bin

Click on the cogwheel to display all the editing settings, and scroll down to locate "Recycle Bin".

Step 3: Restore the deleted file

Here you can find all the recent deleted files. Click the button in the "Restore" column, and you will see the content in its previous area.

Tips:
 It is normal if you cannot see the content in the Recycle Bin immediately after you delete it from the module. Because it usually takes some time for the operation. Please come back and check the Recycle Bin in a moment.
