An example of sharing video from mediasite

Overview:

This guide will show you how to play the mediasite video when you are delivering an online class / hyflex class through BigBlueButton in order to make sure both the online students and onsite students can hear the audio.

There a	re 2 methods for sharing the video:	
1. Using	g the Chrome browser	
You can	use a Chrome browser (or other browsers that allow sharing the audio) to open BB	В.
Click the	e share screen button, and then tick the "Share the system audio " option.

What to know:

It may not be working perfectly when users have internet connection issue or when they are not XJTLU users. And, it may not work for BBB conference where most users accessed without logged in, either. Please also prepare a plan B for just in case.

Step 2: Wait for the generation

You need to wait for some time until the Vodcast encoding is completed.

VIDEO PODCAST (COMPOSITE)

The vodcast job has started encoding the presentation.

Tips:

It may require the students to log in to mediasite. Therefore, it can only be used for internal teaching and learning on LM. BBB for conference may not work properly.

Please also prepare the video link to students, just in case that some students can't watch it.
