

Random access delay in a Quiz

The screenshot shows a quiz interface for 'Example Quiz'. It includes a 'Quiz' tab and a 'Question bank' link. The quiz is scheduled to open on Friday, 5 January 2024, at 11:19 AM and close at 11:58 AM. It allows only one attempt. A large digital timer displays '00:00:01:34', indicating a one-minute and 34-second delay. Below the timer, it says 'Please wait here'. An 'Attempt quiz now' button is visible at the bottom left.

An example of random access delay

Overview:

This guide will show you what the function of random delay access works.

What to know:

This function can decrease the system pressure in high concurrency situation, such as exams in big classes, in order to provide a smooth Quiz experience to students.

Table of Contents

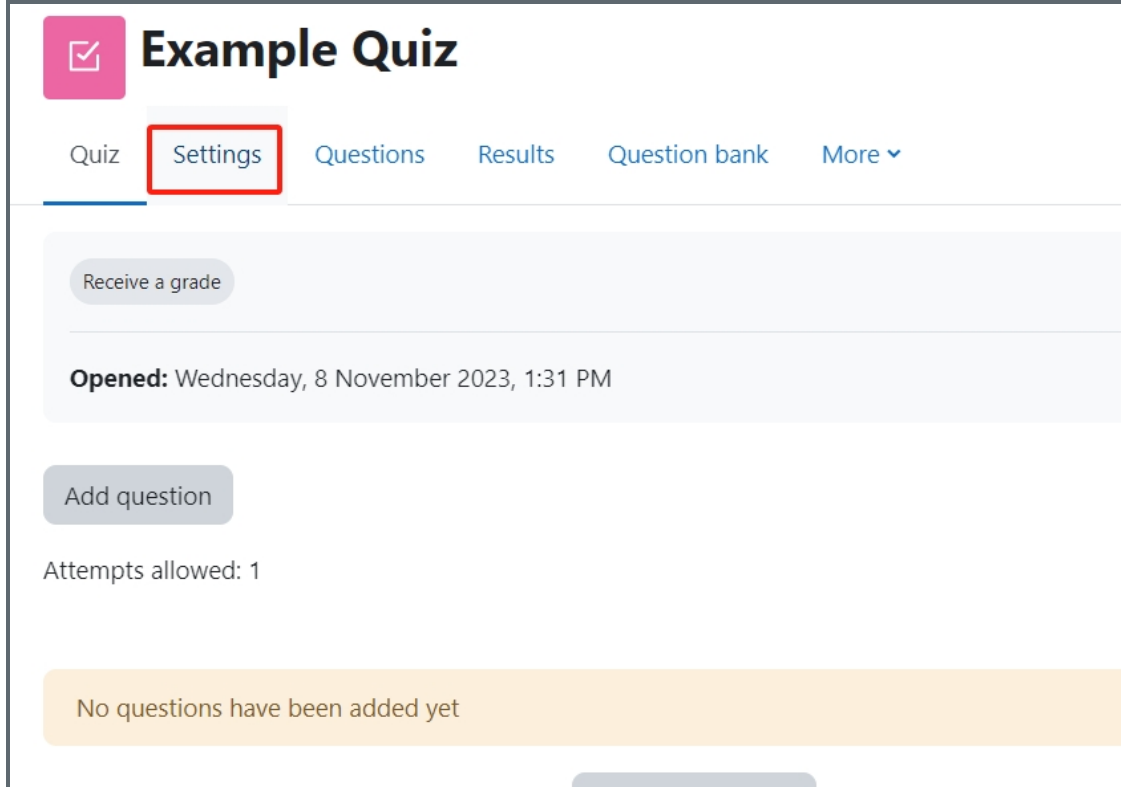

[Step 1: Edit the Quiz settings](#)

[Step 2: Enable 'randomly access delay' function](#)

[How it works for students?](#)

Step 1: Open the quiz settings

Click the 'Settings' tab of a Quiz activity.

Step 2: Enable 'randomly access delay' function

In the section of 'Extra restrictions on attempts', you need to enable the setting 'set a random access delay'.

This setting is disabled by default.

How it works for students?

After enabling this setting, students will get a random access delay when they attempt the quiz.

Each students will get a random delay time, which is 2 minutes in maximum.

This function can decrease the system pressure in high concurrency situation, such as exams in big classes, in order to provide a smooth Quiz experience to students.
