An example of updating questions

Overview:

This guide will show you how to bulk update students' grades after the quiz is closed, especially when it is caused by the wrong question.

What to know:

It can only be used to bulk recalculate the students' grades if you have a coincidence of wrong questions, such as in the following situations:

1. The correct answer to the question was set to the wrong option (Set grade none to the wrong option, grade 100% to the correct one)
2. There is more than one correct answer to the question (Set grade 100% to the correct options)
3. One of the questions is wrong, and you want to give a full mark to all (Set grade 100% to all options)
