An example of exported students list

Overview:

This guide will show you how to download the students' list from the course module.

What to know:

Downloading the students' list is part of the exporting grades function. If the teacher only needs the students' names, ID numbers and email addresses, this guide will show you the steps on how to download without the grades information.

Table of Contents

- Step 1: Open the Grade view
- Step 2: Export an Excel spreadsheet
- Step 3: Disable all selections
- Step 4: Exported Students' list

Step 1: Open the Grade view

In your module area, click the "Grades" button on the course-level menu.

Step 2: Export an Excel spreadsheet

Open the dropdown list on the left side, and choose "Export"

Choose the "Excel spreadsheet".

The screenshot shows the 'Grader report' dropdown menu open. The 'Export' option at the bottom is highlighted with a red box. A red arrow points from the 'Grader report' header to the 'Export' option. The background shows a table with columns 'ID number', 'Email address', and 'Depart'.

| ID number | Email address | Depart |
|-----------|--------------------------|--------|
| | student5@nonmail.com | |
| | student4@nonmail.com | |
| | student1@nonmail.com | |
| | student6@nomail.com | |
| | student1@invalid.noemail | |

The screenshot shows the 'Export to Excel' dialog. The 'Export as' dropdown is set to 'Excel spreadsheet'. The 'Excel spreadsheet' option in the list is highlighted with a red box. The background shows the 'Export' dropdown menu.

Step 3: Disable all selections

Scroll down to the bottom of the page and disable all the activities listed above. Then click the "Download" button.

Step 4: Exported Students' list

Now you can see that the file is being downloaded. Later you could open it in the downloaded folder in your computer.

Later after downloading, you could find the students' information e.g, the first names, ID numbers and Email address are all included in the file.
