An example of different scores for the students in a group submission assignment

## Overview:

This guide will show you how to override the group score and feedback for an individual student within groups.

## What to know:

To conduct a group assignment, there are several prerequisites set-up to make sure the submissions are implemented on behalf of the groups:

1. Create several student groups to cover all relevant students groups;
2. Create a grouping to cover all the groups in question;
3. Apply this grouping in the assignment dropbox and enable "Student submit in groups";

It is only necessary for one group member to make the submission on behalf of the group. Other group members will be automatically recorded as submissions completed. If the teacher grade only one of the submissions, the scores will then be applied to all the other group members, which means all the group members will receive the same score for the group submission.

Sometimes, if the teacher wishes to provide various scores and feedback to individual students, this can be achieved by uploading the grading sheet.

Step 1: Enable offline grading worksheet

Step 2: Download the grading worksheet

Step 3: Edit the grading worksheet

Step 4: Upload the saved grading worksheet

Step 5: Updated score and feedback for different group members within a group

## Step 1: Enable offline grading worksheet

Click the "Edit setting" button for the dropbox and navigate to "Feedback Types" option. Make sure the offline grading worksheet is clicked.

## Step 2: Download the grading worksheet

Go back to the dropbox and click "view all submissions".

The screenshot shows a 'View all submissions' page. At the top, there are several navigation links: 'Assignment', 'Settings', 'Advanced grading', 'Export', 'Download renamed submissions', and 'More'. Below these, there is a 'Mark as done' button. Further down, there are 'Opened' and 'Due' dates. At the bottom of this section, there are two buttons: 'View all submissions' (highlighted with a red box) and 'Grade'. Below this, there is a 'Grading summary' section with a table showing student information. The table has columns for 'Hidden from students' (No), 'Groups' (3), 'Submitted' (3), and 'Time remaining' (6 days 10 hours). The entire screenshot is enclosed in a black border.

In the grading view, click "Grading action" and choose "Download grading worksheet".

Manually edit the different scores and feedback for different group members. Save the feedback file as csv file, which is accepted by the moodle system.

### Step 4: Upload the saved grading worksheet

Go back the grading view and upload the saved grading worksheet.
