How to embed an Articulate course to a Scorm Package activity in your module area

An example of a Scorm Package activity displayed in a Label

Overview:

This guide will show you how to export the course from Articulate Rise and embed it to a Scorm Package activity.

What to know:

After completing a course construction in Articulate Rise, you may optimise the asynchronous course and make it appealing to click via:

embed the course in a Scorm Package activity insert the Scorm Package into a Label displayed as a description/ an image

Table of Contents

Step 1: Export the course from Articulate Rise

Step 2: Create a Scorm Package activity

Step 3: Upload the Articulate Zip file

Step 4: Appearance setting

Step 5: Hide the Scorm package but make it available

Step 6: Copy the URL of the Articulate course

Step 7: Create a Label activity

Step 8: Add an image

Step 9: Insert the URL as the hyperlink

Step 1: Export the course from Articulate Rise

Log in to Articulate Rise and export the course concerned by clicking the 3 dot button and choosing "Publish" > "LMS".

Click "Publish" on the right corner of the page and leave the below settings as default. Then, you will receive an email with a download link from Articulate Rise. Click the link to download the scorm package.

Step 2: Create a Scorm Package activity

Add a new activity and choose "Scorm package" in the activity chooser.

Step 3: Upload the Articulate Zip file

In the setting of the newly added Scorm Package, upload the exported Articulate Zip file in the "Package" setting.

Step 4: Appearance setting

In the "Appearance" setting, click "Show more" to expand all the conditions. Choose "Disabled" in "Display course structure in player" and untick "Display activity name", which will hide the navigation bar of the Articulate course.

Display package	New window 💠
ow less	
Width	100%
Height	500
Options (Prevented by some browsers)	☐ Allow the window to be scrolled ☐ Show the directory links ☐ Show the location bar ☐ Show the menu bar ☐ Show the toolbar ☐ Status
Student skip content 3 structure page	Never •
Disable preview one mode	No \$
Display course 3 structure in player	Disabled \$
Display course structure on entry page	No ‡
Display attempt ?	Entry page only \$

Step 5: Hide the Scorm package but make it available

In "Common module settings", choose "Make available but not shown on the course page" in Availability. Then the Scorm package will be hidden from the students but still available in your module area.

Step 6: Copy the URL of the Articulate course

Click the Scorm Package activity and hit the Enter button to open the course.

Copy the URL of the course and save it as the hyperlink for the Label activity.

Step 7: Create a Text and media area activity

Add a Text and media area activity.

Step 8: Add an image

In the general setting of a newly added "Text and media area" activity, input the description and the image you'd like to associate with the Articulate course. Then click "insert or edit an image"

Click "Browse repositories" to upload the image.

Image properties	×	
Enter URL		
	Browse repositories	
Describe this image for someone who cannot see it		
☐ This image is decorative only	0/ 125	
Size		
x ☐ Auto size Alignment Bottom Bottom		
Save image		

Step 9: Insert the URL as the hyperlink

Click the "Show/hide advanced button" in the rich text editor to expand more options. Then click "HTML"

The HTML will be displayed. Please copy this HTML code and replace the URL of the Articulate course and image inserted:

```
<a target="_blank" href="URL of the Articulate course">
Welcome to the induction session
<img src="URL of the inserted image"><br>&nbsp;
</a><br>>
```

The HTML part is a bit tricky. By doing this, the students will just click on the image and open up the embedded course. You could either insert the URL of the Articulate course in the word description, which is much easier. Remember to choose the text before adding a hyperlink.

Now the student would just simply click on the description / the image to open up the course.
