Video guide for module backup

Overview:

This guide will show you how to back up the module content during module migration.

What to know:

Module migration consists of two straightforward steps:

1. **Module Backup** (A copy step from the previous courses.)
2. **Module Restore** (A paste step to the AY25-26 Core system for you to utilize past year's contents.)

This guide shows you the procedures of module backup .

Only [the Module Leader role](#) can perform the backup and restore action.

Please do not perform a direct backup and restore of Quiz, as this may lead to potential issues. We recommend downloading and importing the Question bank instead, and then recreating the Quiz on the new course page. Question bank and Content bank are not backed up through this process. You may download and import them individually. ([Download and import guides](#))

Due to the Core system archive in the summer

Implement backup before 15th Aug, 2025 , please find the AY24-25 course content [here](#) ;

Implement backup after 15th Aug, 2025 , please find the AY24-25 course content [here](#) ;

Table of Contents

Step 1: Open the AY24-25 courses

Step 2: Choose 'Backup'

Step 3: Adjust the Backup settings

Step 4: Choose the resources that you want to backup

Step 5: Scroll the page down and click Perform backup

Step 6: Click 'Continue'

Step 7: Download the backup file

Step 1: Open the AY24-25 courses

Due to the Core system archive in the summer

Implement backup before 15th Aug, 2025, please find the AY24-25 course content [here](#) ;

Implement backup after 15th Aug, 2025, please find the AY24-25 course content [here](#) ;

TIPS:

To access the previous course content:

Address of the Archive Systems: <https://core-archive.xjtlu.edu.cn/>

You can also find the link on the Dashboard of the current Core system.

Find Your Previous Learning Records

Click the link to view the modules and learning records for the last academic year (AY23-24):

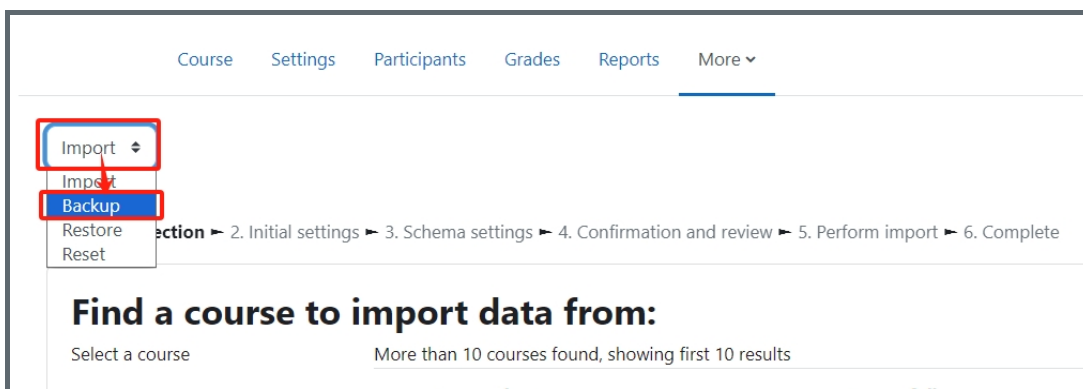

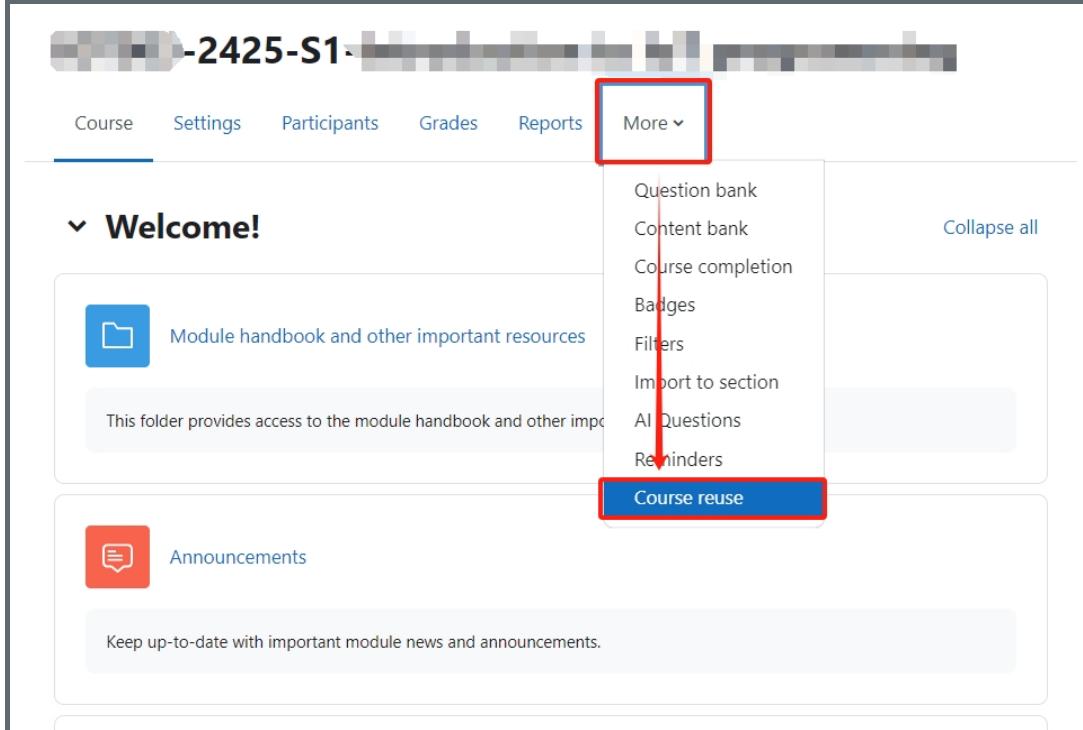

AY23-24 LM Core System

If you would like to view modules and your learning records for *all the past academic years* :

Archive Systems

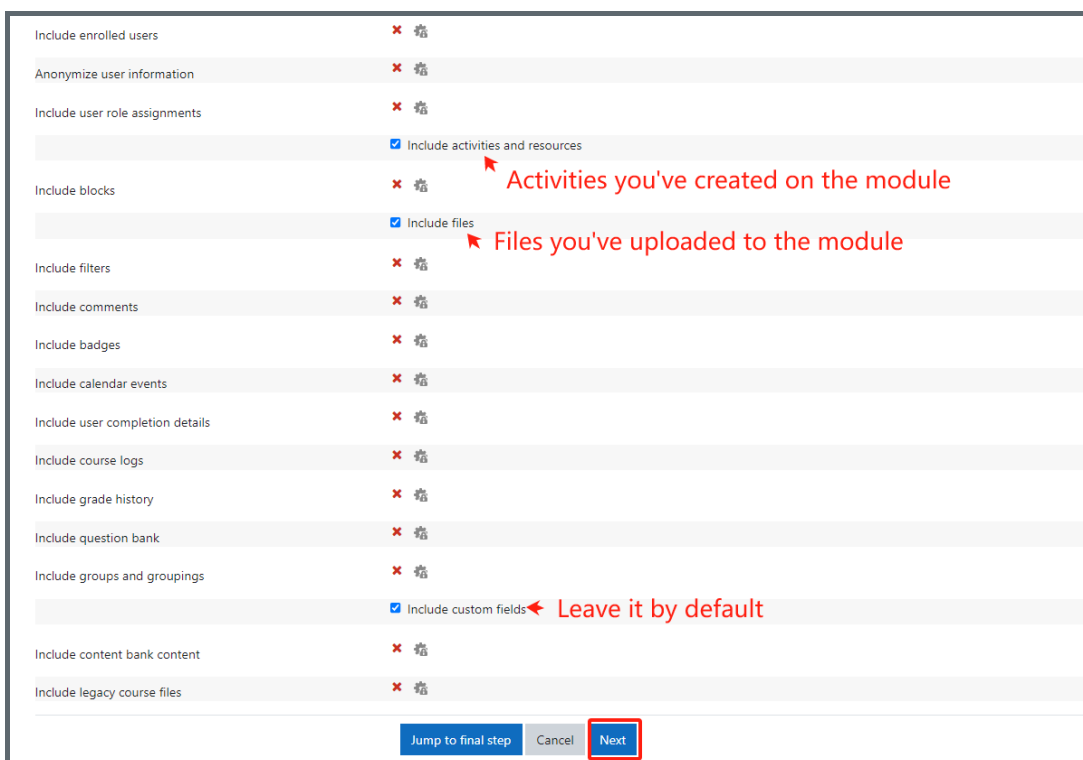

Step 2: Choose 'Backup'

1. On the course level menu, click More > Course reuse
2. In the dropdown menu, choose 'Backup'.

Step 3: Adjust the Backup settings

Adjust the Backup settings and click 'Next'.

Step 4: Choose the resources that you want to backup

 ' Module handbook and other important resources ', ' Announcements ', ' General question and answer forum ' and ' BigBlueButton virtual classroom ' are the default activities and already established in your modules in the LM Core system. You don't need to backup and restore the default activities.

▼ **Welcome!**

Collapse all

Module handbook and other important resources

This folder provides access to the module handbook and other important resources.

Announcements

Keep up-to-date with important module news and announcements.

General question and answer forum

Ask (and help to answer) general questions relating to this module and its content.

BigBlueButton virtual classroom

Participate in live, online learning and teaching sessions and/or view recordings.

1. Untick ' Module handbook and other important resources ', ' Announcements ', ' Attendance ', ' General question and answer forum ' and ' BigBlueButton virtual classroom '.
2. Untick the activities and files you don't want to backup and click 'Next'

1. Initial settings ► 2. **Schema settings** ► 3. Confirmation and review ► 4. Perform backup ► 5. Complete

Include:

Select

Step 5: Scroll the page down and click Perform backup

Previous

Cancel

Perform backup

Step 6: Click 'Continue'

1. Initial settings ► 2. Schema settings ► 3. Confirmation and review ► 4. Perform backup ► **5. Complete**

The backup file was successfully created.

Continue

 The following warning message can be ignored.

1. Initial settings ► 2. Schema settings ► 3. Confirmation and review ► 4. Perform backup ► **5. Complete**

File references to external contents are included in the backup file. These won't work if the backup is restored on a different site.

Step 7: Download the backup file

The module restore will take place within LM Core system, which is distinct from the current archive system. For a seamless restoration, it is crucial to download the backup file of the course onto your local device. Please do NOT use the restore button here.

Import a backup file

Files 

Choose a file...

You can drag and drop files here to add them.

Restore
