Self-enrollment into a module

40 Yezi Yang Wed, Nov 6, 2024 Role management 18503 0

Overview:

This guide will show you how to set up the module page so that users can be enrolled into modules themselves by an enrollment key.

What to know:

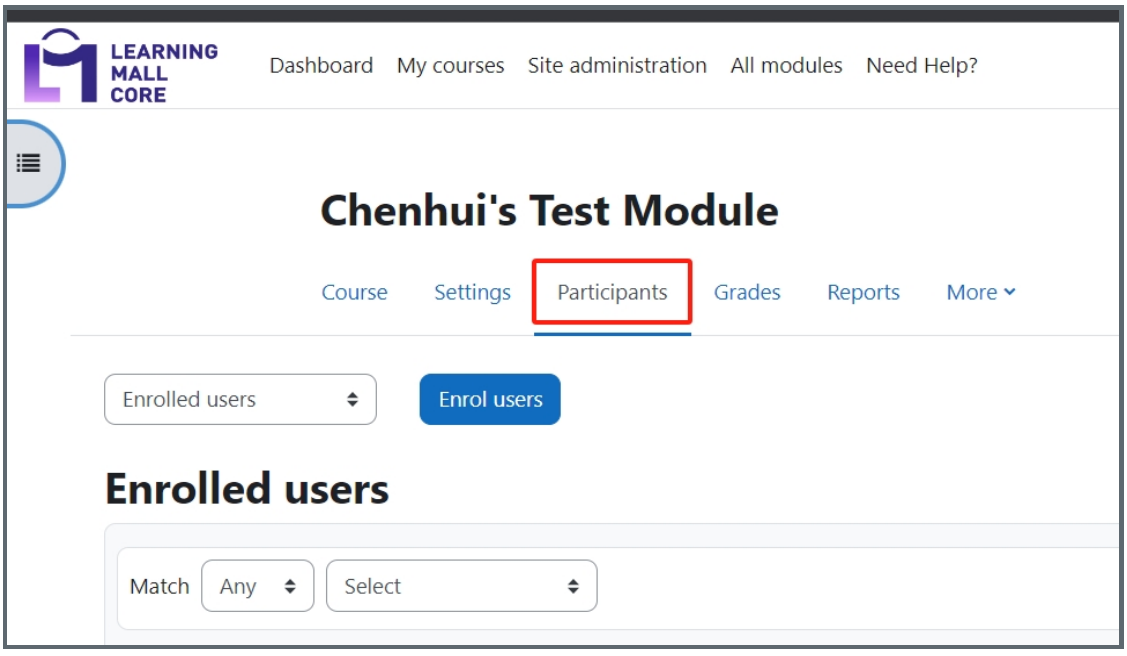

In response to many requests from Learning Mall Core users regarding students being able to audit module areas, LMC now can support student self-enrollment where the module teacher chooses to provide a key to such students. It allows users to enrol themselves through typing in an enrollment key of the module.

Table of Contents

Step 1: Click the 'Edit' icon of the module page
Step 2: Go to 'Users' administration
Step 3: Copy the enrollment key of the Self-enrollment method
Step 4: Change self-enrollment key

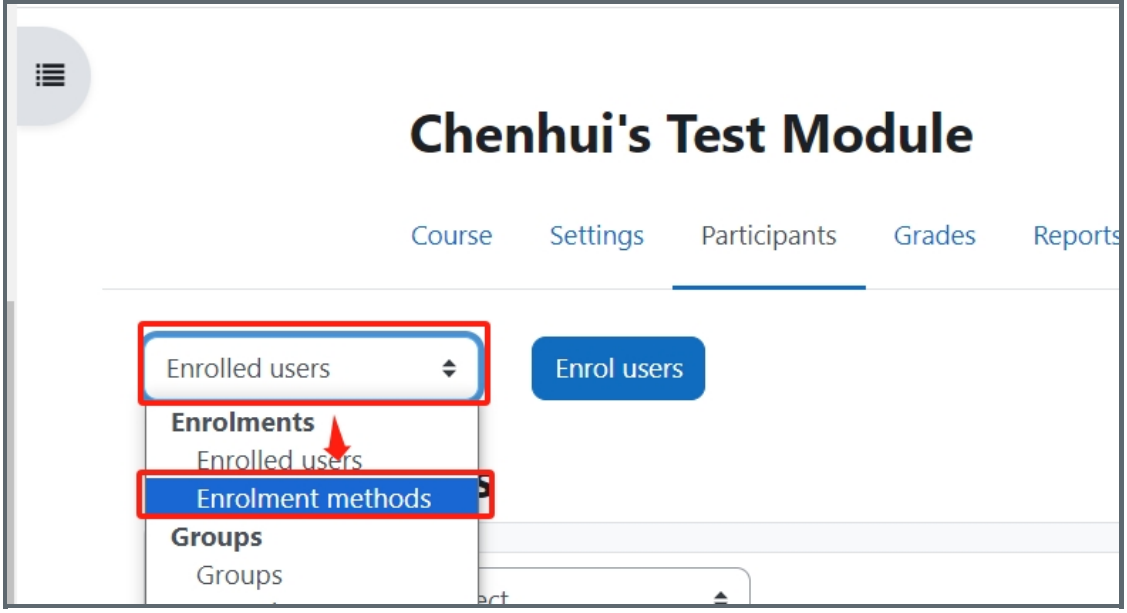

Step 1: Open the 'Participants' tab

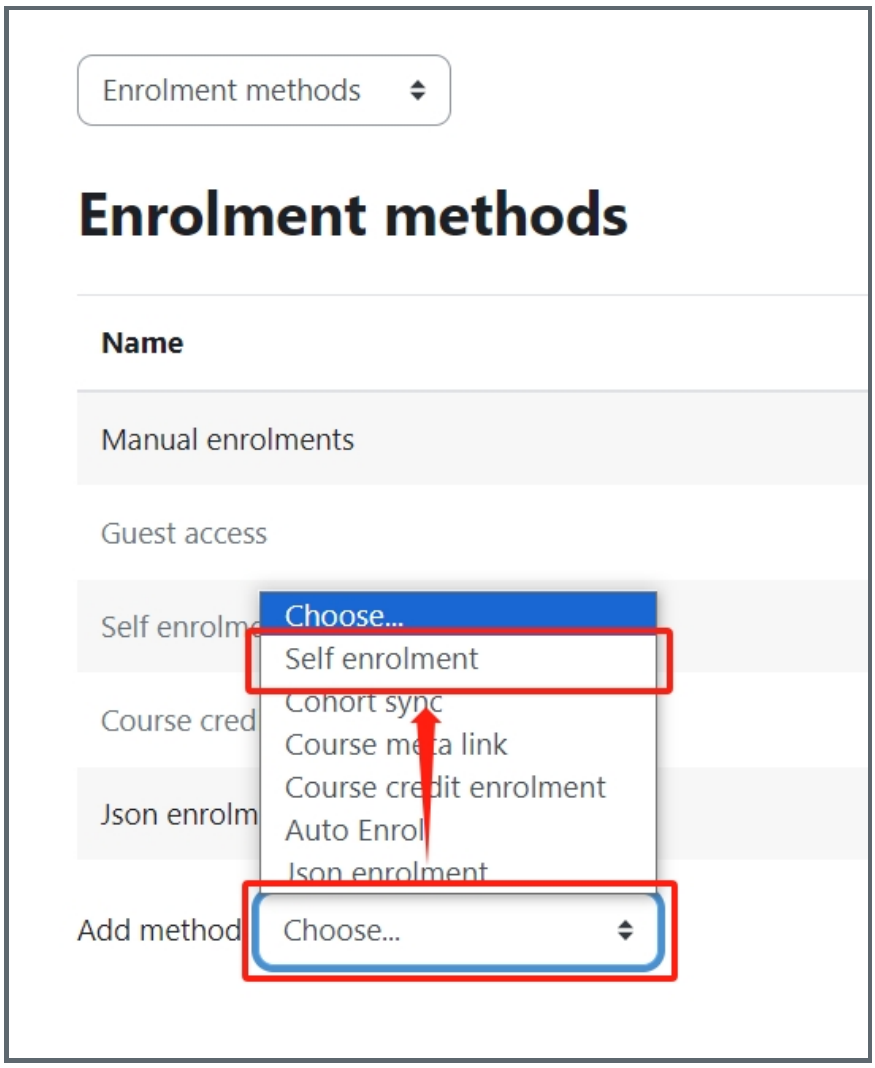

1. Access to the course page.
2. As the below screenshot shows, click "Participants" on the course-level menu.

Step 2: Open 'Self enrolment'

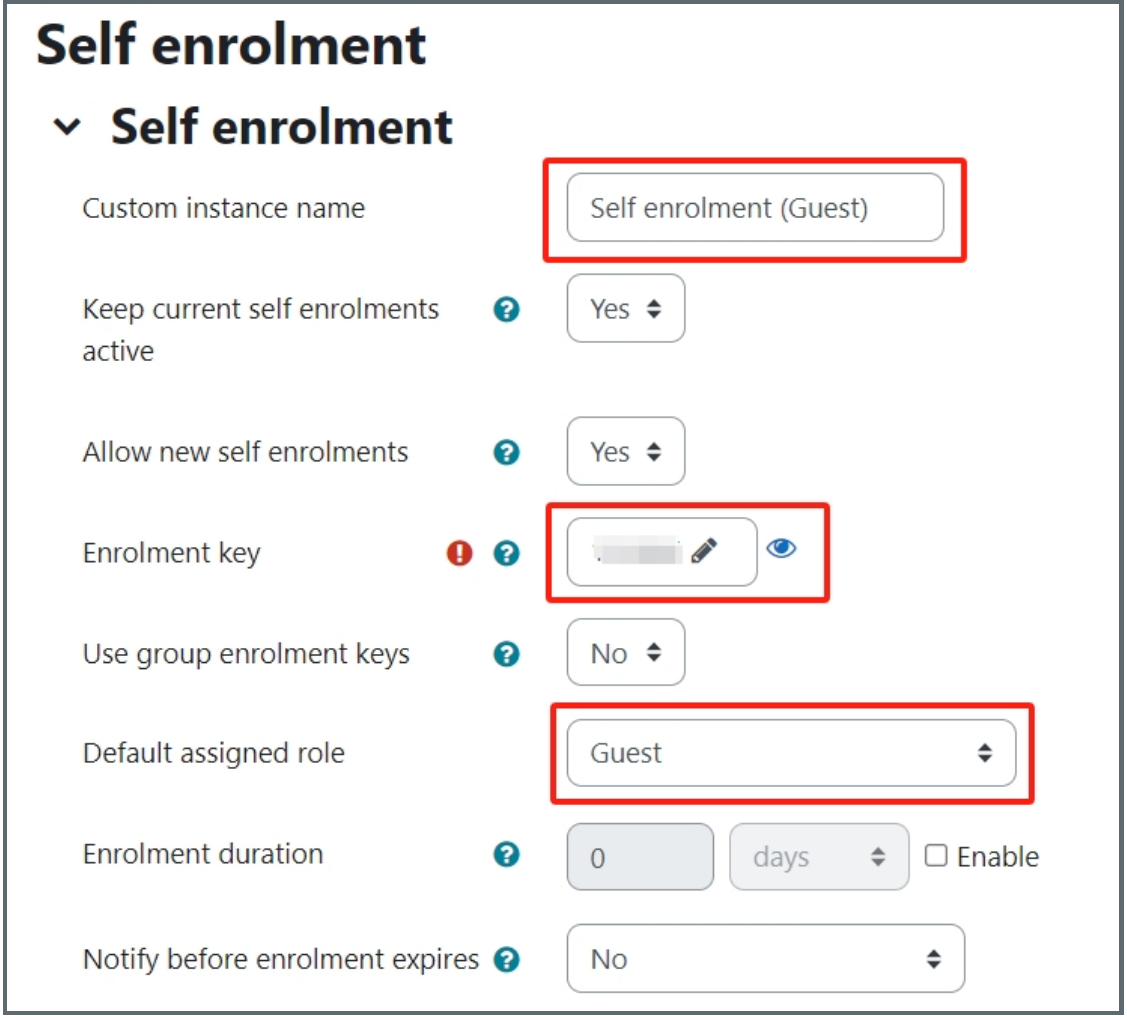

1. Click "Enrolled Users" and click the "Enrolment methods" link.
2. On the new page, click "Choose" and then click "Self enrolment"

Step 3: Copy the enrollment key of the Self-enrollment method

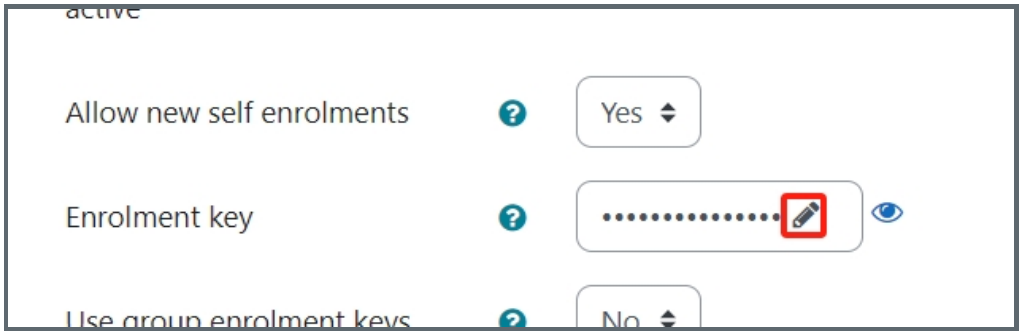

1. On the "Self enrolment" setting, you can input a "Custom instance name".
2. Click on the eye icon beside the "Enrolment key" option and input a key.
3. Copy the revealed key and share it with the external users. Make sure the "Default assigned role" is Guest.
4. Then, click "Add method" to finish.

Step 4: Change self-enrollment key

If you want to change the key/password of self-enrollment, you can click the pencil icon and change the key there.
