

Self-enrollment into a module

Overview:

This guide will show you how to set up the module page so that users can be enrolled into modules themselves by an enrollment key.

What to know:

In response to many requests from Learning Mall Core users regarding students being able to audit module areas, LMC now can support student self-enrollment where the module teacher chooses to provide a key to such students. It allows users to enrol themselves through typing in an enrollment key of the module.
