Overview:

This guide will show you how to shuffle questions in the Quiz activity.

What to know:

The shuffle function will put questions in that section into a random order . This can make it harder for students to share answers, but it also makes it harder for students to discuss a particular question with the teacher. Shuffling is recommended to be enabled in high-stakes summative assessments.

Note:

The shuffling questions function is different from the "Shuffle" within questions function in the Quiz activity general setting. Please refer to [Quiz settings](#) to learn about the shuffling within questions setting.

Step 6: Shuffle the questions in a particular section

In this way, the questions are divided into two sections. You can choose to shuffle or un-shuffle questions in a particular section.

The screenshot shows a 'Questions' management interface. At the top, it says 'Questions: 4 | This quiz is open' and 'Maximum grade 100.00' with a 'Save' button. Below this are buttons for 'Repaginate' and 'Select multiple items', and a note 'Total of marks: 100.00'. The interface is divided into two sections, each with a 'Shuffle' checkbox. Section one, titled 'Section one' and 'Part 1', contains two questions: a 'Choice question example' and a 'Numerical question'. Section two, titled 'Section two' and 'Part 2', contains two questions: a 'True/False question' and a 'Short answer question'. Each question entry includes a question type icon, a number, a title, a description, a 'Always latest' dropdown, a search icon, a trash icon, and a '25.00' mark value with an edit icon. The 'Shuffle' checkboxes for both sections are currently unchecked and are highlighted with red boxes.
