

Quiz - Shuffle questions

Overview:

This guide will show you how to shuffle questions in the Quiz activity.

What to know:

The shuffle function will put questions in that section into a random order . This can make it harder for students to share answers, but it also makes it harder for students to discuss a particular question with the teacher. Shuffling is recommended to be enabled in high-stakes summative assessments.

Note:

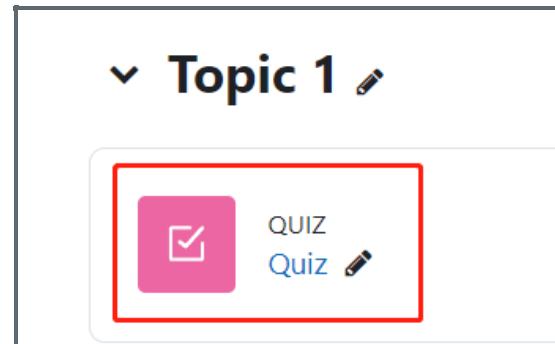

The shuffling questions function is different from the "Shuffle" within questions function in the Quiz activity general setting. Please refer to [Quiz settings](#) to learn about the shuffling within questions setting.
