

Quiz - Shuffle questions

Overview:

This guide will show you how to shuffle questions in the Quiz activity.

What to know:

The shuffle function will put questions in that section into a random order . This can make it harder for students to share answers, but it also makes it harder for students to discuss a particular question with the teacher. Shuffling is recommended to be enabled in high-stakes summative assessments.

Note:

The shuffling questions function is different from the "Shuffle" within questions function in the Quiz activity general setting. Please refer to [Quiz settings](#) to learn about the shuffling within questions setting.

Step 6: Shuffle the questions in a particular section

In this way, the questions are divided into two sections. You can choose to shuffle or un-shuffle questions in a particular section.

The screenshot displays the 'Questions' management interface. At the top, it shows 'Questions: 4 | This quiz is open', 'Maximum grade 100.00', and a 'Save' button. Below this are 'Repaginate' and 'Select multiple items' buttons, and 'Total of marks: 100.00'. The interface is divided into two sections:

- Section one** (Part 1): Contains two questions. The 'Shuffle' checkbox is checked and highlighted with a red box.
- Section two** (Part 2): Contains two questions. The 'Shuffle' checkbox is unchecked and highlighted with a red box.

Each question entry includes a question type, a brief description, a 'Always latest' dropdown, search and delete icons, and a '25.00' mark value with an edit icon. The sections are labeled 'Page 1' and 'Page 2' respectively, with 'Add' buttons and dropdown menus.
