A screenshot of a quiz question interface. It features a light blue background with a white question text: "Which city is XJTLU located in?". Below the question is a label "Answer:" followed by a white rectangular input field with rounded corners.

An example of the short answer question

Overview:

This guide details various settings associated with short answer question type in Quiz activity.

What to know:

In a short answer question, the respondent types a word or short phrase into the question. There may be several possible correct answers, each with a different grade if needed. Answers may be case sensitive if needed. The system will grade the question automatically with the answers that you programmed into the system. It's a good idea to keep the required answer as short as possible to avoid missing a correct answer that's phrased differently.

- [Step 5: Configure general settings](#)
- [Step 6: Configure answers settings](#)
- [Step 7: Add tags if needed](#)

Step 1: Access the Quiz activity where you want to create the question

In your module area/course, click the link of the Quiz activity where you want to create a new question.

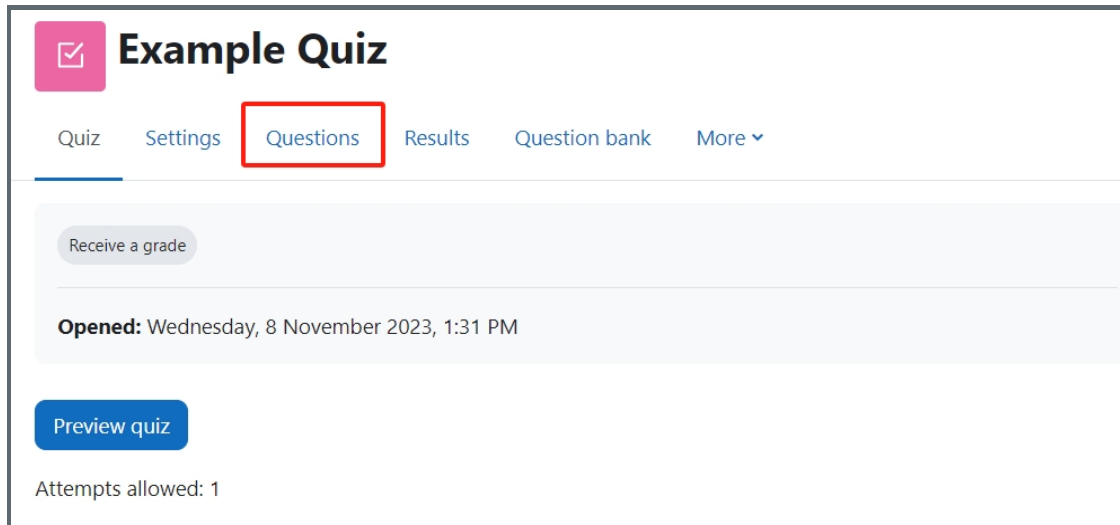

A screenshot of a quiz activity interface. At the top, there is a dropdown menu labeled "Topic 5". Below this, there is a quiz card. The card has a pink square icon with a white checkmark and the text "Example Quiz" next to it. To the right of the card is a button labeled "Receive a grade". At the bottom of the card, there is a grey bar with the text "Opened: Wednesday, 8 November 2023, 1:31 PM".

Note: If an appropriate Quiz activity doesn't exist in your module area/course, please see [Add a quiz](#) for details of how

to create one.

Step 2: Open the 'Questions' tab.

1. Open the 'Questions' tab.

Step 3: Add a new question

1. On the following page, click the 'Add' link.
2. Click the 'a new question' link in the dropdown menu.

Step 4: Choose a question type

1. Locate and select the short answer question type from the pop-up window.
2. Click the 'Add' button.

Choose a question type to add

QUESTIONS

☐  Multiple choice

☐  True/False

☐  Matching

☒  Short answer

☐  Numerical

☐  Essay

☐  All-or-Nothing Multiple Choice

☐  Calculated

☐  Calculated multichoice

☐  Calculated simple

☐  CodeRunner

☐  Drag and drop

Allows a response of one or a few words that is graded by comparing against various model answers, which may contain wildcards.

Step 5: Configure general settings

Category:

You can choose which category you would like to put your question in from the dropdown menu. If you have not created any category in your question bank, you can put the questions in the default category.

Question name:

The question name is to help you to identify your questions. It is extremely useful when you view your questions in the question bank. It is recommended to put in enough information in the question name to help you to identify your questions quickly, especially in the question bank. A good example will be a question name like "Week1-location of XJTLU". Vague question names like "Q1" should be avoided. This section is mandatory. **Please note, students will not see the question names.**

Question text:

Question text is a place where you can put in the question and instructions, for example, "Please specify which city XJTLU locates in:". This section is mandatory. It is also possible to put images or videos in the question text.
