An example of the essay auto-grade question

## Overview:

This guide will show you how to create an essay auto-grade question type within the Quiz activity.

## What to know:

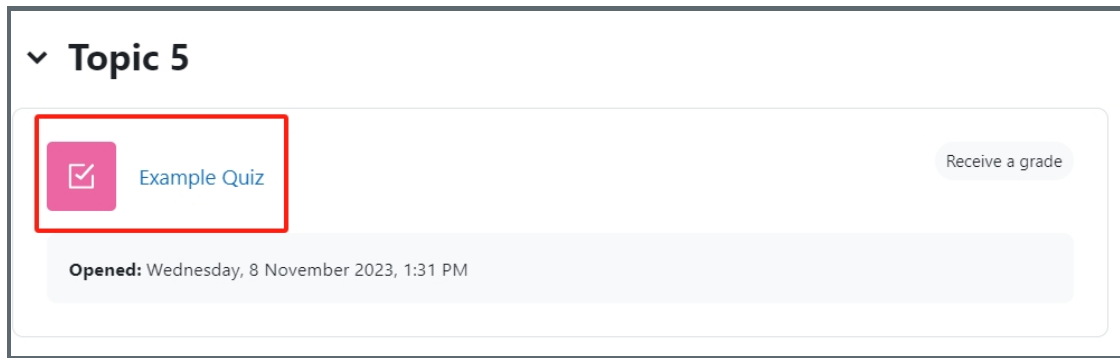

The essay question type allows students to upload files or online texts. This question is automatically graded. Grades can be overridden later by teachers. This question type can be useful when you want students to write a certain number of words/sentences/paragraphs or include a few sample phrases in their essays. However, please be noted the system will not be able to grade the contents of the essay which means you will need to grade students' work manually afterwards if you want to ensure the quality of the essays.

## Table of Contents

- [Step 1: Access the Quiz activity](#)
- [Step 2: Open the 'Questions' tab.](#)
- [Step 3: Add a new question](#)
- [Step 4: Choose a question type](#)
- [Step 5: Configure general settings](#)
- [Step 6: Configure Response Options](#)
- [Step 7: Response and sample template \(if needed\)](#)
- [Step 8: Grader information \(if needed\)](#)
- [Step 9: Configure auto-grading settings](#)
- [Step 10: Add tags if needed](#)

Step 1: Access the Quiz activity

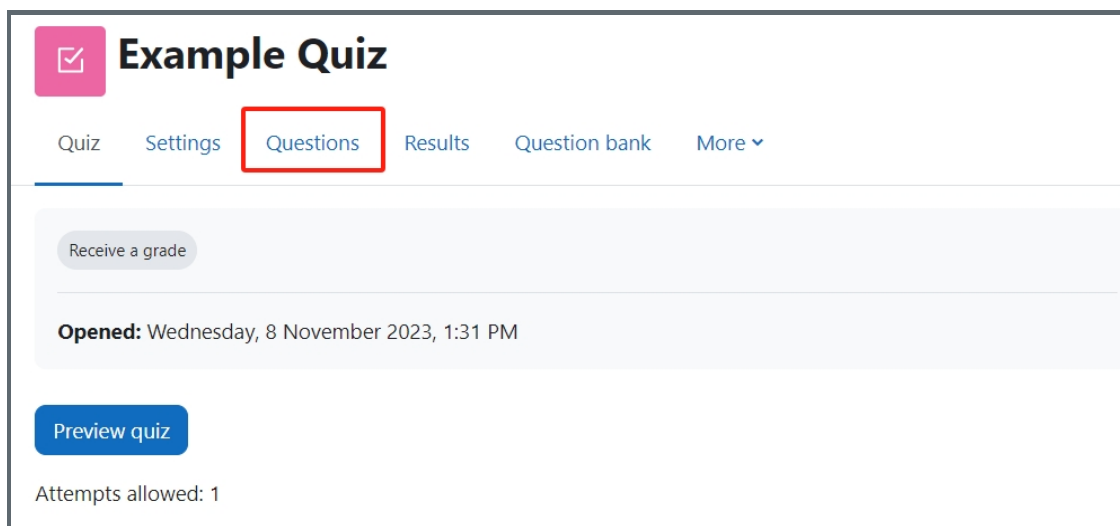

In your module area/course, click the link of the Quiz activity.

Note: If an appropriate Quiz activity doesn't exist in your module area/course, please see [Add a quiz](#) for details of how to create one.

## Step 2: Open the 'Questions' tab.

1. Open the 'Questions' tab.

## Step 3: Add a new question

1. On the following page, click the 'Add' link.
2. Click the 'a new question' link in the dropdown menu.

 **Example Quiz**

 Add ▾

 a new question

 from question bank

 a random question

#### Step 4: Choose a question type

1. Locate and select the essay question type from the pop-up window.
2. Click the 'Add' button.

### Choose a question type to add

☐  CodeRunner

☐  Drag and drop into text

☐  Drag and drop markers

☐  Drag and drop onto image

☐  Drag-and-Drop Matching

☐  Embedded answers (Cloze)

☒  Essay (auto-grade)

☐  Gapfill

☐  Matrix/Kprime

☐  Ordering

☐  Pattern match

☐  Random select

Allows an essay of several sentences or paragraphs to be submitted as a question response. The essay is graded automatically. The grade may be overridden later.

[Add](#)

[Cancel](#)

## Step 5: Configure general settings

### Category:

You can choose which category you would like to put your question in from the dropdown menu. If you have not created any category in your question bank, you can put the questions in the default category.

### Question name:

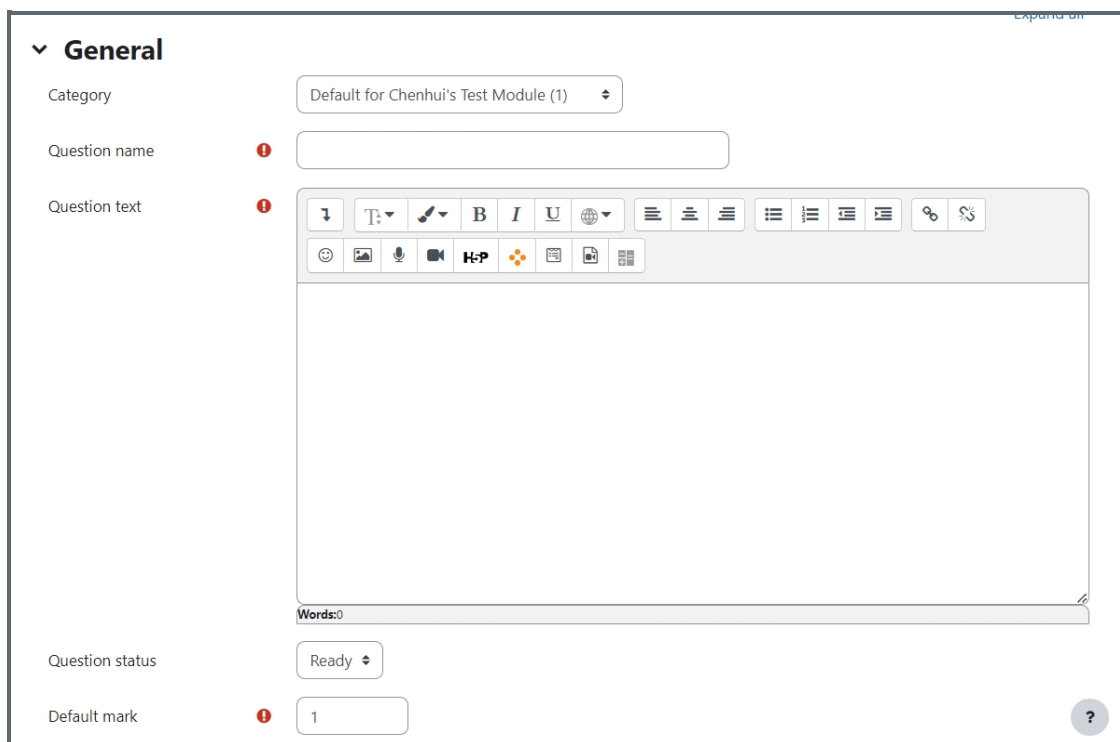

The question name is to help you to identify your questions. It is extremely useful when you view your questions in the question bank. It is recommended to put in enough information in the question name to help you to identify your questions quickly, especially in the question bank. A good example will be a question name like "Week1-location of XJTLU". Vague question names like "Q1" should be avoided. This section is mandatory. **Please note, students will not see the question names.**

### Question text:

Question text is a place where you can put in the question or instructions, for example, "Please write 100 words about your experience of studying at XJTLU". This section is mandatory. It is also possible to put images or videos in the question text.

### Default mark:

This is where you put the mark of the question. You can change the mark even during and after the quiz.

The screenshot shows a 'General' settings form for a question. It includes the following fields and controls:

- Category:** A dropdown menu showing 'Default for Chenhui's Test Module (1)'.
- Question name:** A text input field with a red information icon to its left.
- Question text:** A large text area with a red information icon to its left. Above the text area is a rich text editor toolbar with icons for undo, redo, text color, background color, bold, italic, underline, link, unlink, bulleted list, numbered list, decrease indent, increase indent, link, unlink, and help. Below the text area is a 'Words:0' counter.
- Question status:** A dropdown menu showing 'Ready'.
- Default mark:** A text input field containing the number '1' with a red information icon to its left.

A question mark icon is located in the bottom right corner of the form.

### General feedback:

Feedback can be given to your students at different quiz stages depending on how the settings are configured.

### ID number:

Please leave it blank.

Please write 100 words about your experience of studying at XJTLU. **(Show sample)**

## Step 9: Configure auto-grading settings

Enable automatic grading:

The default is yes. Please leave it as it is.

Type of countable items:

You need to let the system know what you want the system to look for.

Expected number of items:

You need to let the system know how many items are expected.

Show student feedback?

The default is no, but you can change it if needed.

Show grade calculation?

The default is no, but you can change it to show to students and/or teachers if needed.

Show text statistics?

There is a number of statistics that the system can show to student and/or teachers. It is recommended to enable this function.

Common errors

Glossary of errors ?

Penalty per error ?

0% of the question grade.

Error matching behavior ?

Match full or partial words.

Match is case-insensitive.

Recognize line breaks.

## Step 10: Add tags if needed

You can put in a tag or several tags by key in the tags. Click "x" to delete a tag. Tags can help you to organize your questions in your question bank. Read more about the use of Tag from this article ([link](#)). Tags are designed for your question management purpose. It will not be displayed to students
