

Matching Question

Please match the pictures of the dogs with the names:

| | |
|---|--|
|  | <input type="text" value="Choose..."/> |
|  | <input type="text" value="Choose..."/> |
|  | <input type="text" value="Choose..."/> |

An example of the matching question

Overview:

This guide will show you how to create a matching question type within the Quiz activity.

What to know:

The matching question type allows students to select words by clicking on them. It can be a useful question type for language learning.

Table of Contents

- [Step 1: Access the Quiz activity](#)
- [Step 2: Questions editing page](#)
- [Step 3: Add a new question](#)
- [Step 4: Choose a question type](#)
- [Step 5: Configure general settings](#)
- [Step 6: Configure answer settings](#)
- [Step 7: Add tags if needed](#)

Step 1: Access the Quiz activity

In your module area/course, click the link of the Quiz activity.

▼ Topic 5

Example Quiz

Receive a grade

Opened: Wednesday, 8 November 2023, 1:31 PM

Note: If an appropriate Quiz activity doesn't exist in your module area/course, please see [How to add a Quiz activity](#) for details of how to create one.

Step 2: Questions editing page

1. Click the 'Questions' tab.

Example Quiz

[Quiz](#) [Settings](#) [Questions](#) [Results](#) [Question bank](#) [More ▼](#)

[Receive a grade](#)

Opened: Wednesday, 8 November 2023, 1:31 PM

[Preview quiz](#)

Attempts allowed: 1

Step 3: Add a new question

1. On the following page, click the 'Add' link.
2. Click the 'a new question' link in the dropdown menu.

Step 5: Configure general settings

Category:

You can choose which category you would like to put your question in from the dropdown menu. If you have not created any category in your question bank, you can put the questions in the default category.

Question name:

The question name is to help you to identify your questions. It is extremely useful when you view your questions in the question bank. It is recommended you put in enough information in the question name to help you to identify your questions quickly, especially in the question bank. A good example will be a question name like "Week1-location of XJTLU". Vague question names like "Q1" should be avoided. This section is mandatory. **Please note, students will not see the question names.**

Question text:

Question text is a place where you can put in the question or instructions. This section is mandatory. It is also possible to put images or videos in the question text.

Default mark:

This is where you put the mark of the question. You can change the mark even during and after the quiz.

The screenshot shows a web interface for editing a question. At the top, there's a tab labeled 'General'. Below it, the 'Category' is set to 'Default for Chenhui's Test Module (1)'. The 'Question name' field is empty and has a red information icon to its left. The 'Question text' field is also empty and has a red information icon to its left. Above the text area is a rich text editor toolbar with various icons for text formatting (bold, italic, underline, link, unlink, list, indent, outdent, decrease indent, increase indent), alignment (left, center, right, justified), and other functions (undo, redo, search, help). Below the text area, there's a 'Words:0' counter. The 'Question status' is set to 'Ready'. The 'Default mark' is set to '1'. A red information icon is next to the 'Default mark' field. In the bottom right corner, there's a circular button with a question mark icon.

General feedback:

Feedback can be given to your students at different stages of the quiz depends on how the settings are configured.

ID number:

Please leave it blank.
