

All-or-nothing multiple choice

An example of All or Nothing Multiple Choice question type

Overview

All-or-nothing multiple choice question type allows students to choose multiple answers. But it differs from the Multiple choice grading method that **partial correct answers will not be allowed**.

What to know

All or nothing multiple choice question type will see the response as correct only when all and only the correct answers are selected. If you lost one correct answer or select one wrong option, you will get 0 for this question though you are partially correct. It's different from the multiple choice question type, where teachers can set different percentages of grades for each answer, and the partially correct answer will get some grades.

Table of Contents

- [Step 10: Save changes](#)

Step 1: Access the Quiz activity where you want to create the question

In your module area/course, click the link of the Quiz activity where you want to create a new Multiple Choice question.

▼ Topic 5

Example Quiz

Receive a grade

Opened: Wednesday, 8 November 2023, 1:31 PM

Note: If an appropriate Quiz activity doesn't exist in your module area/course, please see [Add a Quiz](#) for details on creating one.

Step 2: Questions editing page

1. Click the 'Questions' tab.

The screenshot shows the 'Example Quiz' interface. At the top left is a pink square icon with a white checkmark. To its right is the title 'Example Quiz'. Below the title is a navigation menu with tabs: 'Quiz', 'Settings', 'Questions', 'Results', 'Question bank', and 'More'. The 'Questions' tab is highlighted with a red box. Below the navigation menu is a 'Receive a grade' button. Underneath that is the text 'Opened: Wednesday, 8 November 2023, 1:31 PM'. At the bottom left is a blue 'Preview quiz' button. Below the button is the text 'Attempts allowed: 1'.

Step 3: Add a new question

1. On the following page, click the 'Add' link.
2. Click the 'a new question' link in the drop-down menu.

1 **The Loch Ness Monster is a type of?** The Loch Ness Monster ... Always

- + a new question
- + from question bank
- + a random question

Step 4: Choose a question type

1. Locate and select the Multiple choice question type from the pop-up window.
2. Click the 'Add' button.

Choose a question type to add ×

-  Short answer
-  Numerical
-  Essay
-  All-or-Nothing Multiple Choice
-  Calculated
-  Calculated multichoice
-  Calculated simple
-  CodeRunner
-  Drag and drop into text
-  Drag and drop markers
-  Drag and drop onto image
-  Drag-and-Drop

Allows the selection of multiple responses from a pre-defined list and uses all-or-nothing grading (100% or 0%).

Add Cancel

Step 5: General settings

Set the general information of the question by:

General

Category: Default for Chenhui's Test Module (1) ▾

Question name:

Question text:

Question status: Ready ▾

Default mark:

Words:0

Category: Where you want the question to be saved.

Question name: It will be shown when you are searching the questions in question bank, but students can't see the question name.

Question text: It describes the question itself and students will see it when taking the quiz.

Default mark: Please set the default mark as 1. We can change the marks later when you are editing the whole quiz.

General feedback:

ID number:

Shuffle the choices? [?](#)

Number the choices?: a., b., c., ... ▾

Show standard instructions:

Words:0

General feedback: General feedback is shown to the student after they have completed the question. Unlike specific feedback, which depends on the question type and what response the student gave, the same general feedback text is shown to all students. You can use the general feedback to give students a fully worked answer and perhaps a link to more information they can use if they do not understand the questions.

ID number: If used, the ID number must be unique within each question category. It provides another way of identifying a question, which is sometimes useful but can usually be left blank.

Shuffle the choices: You can tick/untick this option. It means the order of the choices will be different for different

students/attempts.

Number the choices: It changes the number format for each option, such as using the "1, 2, 3..." or "a, b, c..."

Step 6: Answers settings

Set the content, grade and feedback for each choice:

The screenshot displays the 'Answers' configuration panel. It is divided into two main sections: 'Choice 1' and 'Feedback'. Each section features a rich text editor with a toolbar for text formatting (numbered list, bulleted list, indent, outdent, bold, italic, underline, link, unlink, image, audio, video, H5P) and a 'Words:0' character count. Below the 'Choice 1' editor is a checkbox labeled 'Correct'. The 'Feedback' section also includes a 'Words:0' counter.

Choice: It's the place where you can create the answer options. Text, images, audio, video, and other media are supported using the text editor.

Correct: Where you can mark the correct answers for the question.

Feedback: The feedback content for each answer can be the explanation of the option about why it is right or wrong. (Optional)

Tips: If the boxes of the answer options are not enough, please click the button "Blanks for 3 more choices" to add more options:

Blanks for 3 more choices

Step 7: Combined feedback (Optional)

Set the combined feedback for the question, which will be shown as the feedback according to students' responses (there's no partial correct response which is different from the multiple choice question type):

Combined feedback

For any correct response

Your answer is correct.

Words:4

For any incorrect response

Your answer is incorrect.

Words:4

Options Show the number of correct responses

Step 8: Multiple tries

When questions are run using the 'Interactive with multiple tries' or 'Adaptive mode' behaviour, so that the student will have several tries to get the question right, then this option will be useful to control how much they are penalised and what hint you will receive for each incorrect try :

Multiple tries

Penalty for each incorrect try 33.333333%

Hint 1

Words:0

Hint 1 options Options Clear incorrect responses Show the number of correct responses Show the feedback for the selected responses.

Hint 2

Words:0

Hint 2 options Options Clear incorrect responses Show the number of correct responses Show the feedback for the selected responses.

Penalty for each incorrect try:

The penalty is a proportion of the total question grade, so if the question is worth three marks, and the penalty is 0.3333333, then the student will score 3 if they get the question right first time, 2 if they get it right the second try, and 1 if they get it right on the third try.

For some multi-part questions, this scoring logic is applied separately to each part of the question. The details depend on the question type and can be complicated, but the principle is to give students credit for the knowledge they have demonstrated as fairly as possible.

Hint: It is the message you want the students to see when they are wrong. It will help them to select the right answer in the next attempt. You can create more than one hints according to the attempts the quiz allowed.

Hint options: There are some options for automatic response, such as clear incorrect responses and show the number of correct responses.

Step 9: Tags (Optional)

Using tags, you can easily search for the question by the tag in the question bank.

▼ **Tags**
