

3 - How to edit attendance recording manually

An example of edit attendance recording manually

Overview:

This guide will show you how to change your students' attendance recording manually.

What to know:

It is recommended by the "Policy on Student Attendance and Engagement" for teachers to use appropriate way to record student attendance. Learning mall has provided the attendance activity, where attendance can be easily recorded by students themselves in the module area with fully considered access control and reviewed at any time any place. The system also automatically generates reports for both teachers and students, highlights students whose attendance are below university expectation, as well as sends warning emails.

We provide several specific user guides about the use of attendance. This guide focuses on manual editing. If you are new to the attendance function, please check the other attendance guidances for more details.

Tips:

If you have over 100 students, you may need to search your student's name between the pages. Or you can change the paging option from "100" to "not use paging", which will show all your students on one page. This will take a longer time for the system to load all the students for you. If you want to update your students' attendance record in excel and import the result back to the system, please check the user guide about how to export and import attendance recordings.
