

True and False question

The highest mountain peak in the world is the Mount Everest of Himalayan.

Select one:

- True**
- False**

An example of True and False Question type

Overview

True or False question type is one of the simple and often-used question types. Usually, it will ask a student to judge a statement, and give the answer like "True" or "False". It is also a kind of on-answer only question type.

What to know

True and False question type allows students to judge a statement with a "True" and "False" option for them to select.

Table of Contents

- [Step 1: Access the Quiz activity where you want to create the question](#)
- [Step 2: Questions editing page](#)
- [Step 3: Add a new question](#)
- [Step 4: Choose a question type](#)
- [Step 5: General settings](#)
- [Step 6: Multiple tries](#)
- [Step 7: Tags \(Optional\)](#)
- [Step 8: Save changes](#)

Step 1: Access the Quiz activity where you want to create the question

In your module area/course, click the link of the Quiz activity where you want to create a new True and False question.

Topic 5

Example Quiz

Opened: Wednesday, 8 November 2023, 1:31 PM

Receive a grade

Note: If an appropriate Quiz activity doesn't exist in your module area/course, please see [Add a Quiz](#) for details of how to create one.

Step 2: Questions editing page

1. Click the 'Questions' tab.

The screenshot shows the 'Example Quiz' editing interface. At the top, there is a navigation bar with tabs: Quiz, Settings, **Questions** (which is highlighted with a red box), Results, Question bank, and More. Below the navigation bar, there is a button labeled 'Receive a grade'. A message indicates the quiz was opened on Wednesday, 8 November 2023, at 1:31 PM. A blue button labeled 'Preview quiz' is visible. At the bottom, it says 'Attempts allowed: 1'.

Step 3: Add a new question

1. On the following page, click the 'Add' link.
2. Click the 'a new question' link in the drop-down menu.

The screenshot shows the 'Example Quiz' Questions page. The navigation bar at the top is identical to the previous screenshot. Below the navigation bar, the word 'Questions' is prominently displayed. A message says 'Questions: 1 | This quiz is open'. On the right, there are buttons for 'Maximum grade' (set to 100.00) and 'Save'. Below these, it says 'Total of marks: 1.00' and there is a 'Shuffle' checkbox. A blue button labeled 'Add' with a dropdown arrow is highlighted with a red box. A dropdown menu is open, showing three options: '+ a new question' (which is also highlighted with a red box and has an arrow pointing to it), '+ from question bank', and '+ a random question'.

Step 4: Choose a question type

1. Locate and select the True and False question type from the pop-up window.
2. Click the 'Add' button.

Choose a question type to add

QUESTIONS

-  Multiple choice
-  True/False
-  Matching
-  Short answer
-  Numerical
-  Essay
-  All-or-Nothing
-  Multiple Choice
-  Calculated
-  Calculated multichoice
-  Calculated simple
-  CodeRunner

A simple form of multiple choice question with just the two choices 'True' and 'False'.

Add **Cancel**

Step 5: General settings

Set the general information of the question by:

General

Category: Default for Chenhui's Test Module (1)

Question name:

Question text:

Words: 0

Question status: Ready

Default mark: 1

Category: Where you want the question to be saved.

Question name: It will be shown when you are searching the questions in question bank, but students can't see the question name.

Question text: It describes the question itself and students will see it when taking the quiz.

Default mark: Please set the default mark as 1. We can change the marks later when you are editing the whole quiz.

The screenshot shows the 'Question editor' interface. At the top, there is a toolbar with various editing icons. Below the toolbar, there are two main sections: 'General feedback' and 'Feedback for the response 'True''. Each section contains a rich text editor with a toolbar and a 'Words:0' counter. The 'General feedback' section has a placeholder 'Words:0'. The 'Feedback for the response 'True'' section also has a placeholder 'Words:0'. Below these sections, there are input fields for 'ID number', 'Correct answer', and 'Show standard instructions'. The 'Correct answer' field is set to 'False'. The 'Show standard instructions' field is set to 'No'.

General feedback: General feedback is shown to the student after they have completed the question. Unlike specific feedback, which depends on the question type and what response the student gave, the same general feedback text is shown to all students. You can use the general feedback to give students a fully worked answer and perhaps a link to more information they can use if they did not understand the questions.

ID number: If used, the ID number must be unique within each question category. It provides another way of identifying a question which is sometimes useful, but can usually be left blank.

Correct answer: If the correct answer of the T/F question is "True" or "False".

Feedback for response "True": Message the student will see when they select "True". (Optional)

Feedback for response "False": Message the student will see when they select "False". (Optional)

Step 6: Multiple tries

When questions are run using the '*Interactive with multiple tries*' or '*Adaptive mode*' behaviour, so that the student will have several tries to get the question right, then this option will be useful to control how much they are penalised and what hint you will receive for each incorrect try :

The screenshot shows a settings box for 'Multiple tries'. It has a title 'Multiple tries' with a dropdown arrow. Below the title, there is a field labeled 'Penalty for each incorrect try' with a value of '1'. To the right of the value is a help icon (a question mark inside a circle) and a small number '1'.

Penalty for each incorrect try:

When questions are run using the 'Interactive with multiple tries' or 'Adaptive mode' behaviour, so that the student will have several tries to get the question right, then this option controls how much they are penalised for each incorrect try.

The penalty is a proportion of the total question grade, so if the question is worth three marks, and the penalty is 0.3333333, then the student will score 3 if they get the question right first time, 2 if they get it right second try, and 1 if they get it right on the third try.

For some multi-part questions this scoring logic is applied separately to each part of the question. The details depend on the question type and can be complicated, but the principle is to give students credit for the knowledge they have demonstrated as fairly as possible.

Step 7: Tags (Optional)

If you are using tags, you can easily search for the question by the tag in the question bank.

▼ **Tags**

Tags	Any tags
